Rose*

POMONA SHIP C. O. D.

Direct to you. Require no cash to apply on account. We trust you. We were the first nurserymen to ship C. O. D. All others have followed.

6% If Cash Is Sent With Order, We Allow **6%**
6% Discount During the Entire Year. **6%**
No discount allowed when shipped C. O. D.

PREPAID OFFER

On all orders that amount to \$10.00 net and over, we prepay transportation to all points in the following states and allow no premium.

Connecticut	Maryland	Ohio
Delaware	Massachusetts	Pennsylvania
Dist. of Columbia	Michigan	Rhode Island
Illinois	New Hampshire	Vermont
Indiana	New Jersey	Virginia
Maine	New York	West Virginia

To all other states we will reimburse you for one-half transportation charges.

PREMIUM OFFER

On all orders of \$7.50 to \$9.50 net, we give one SWISS WEATHER PROPHET illustrated on page 5, which will be mailed upon receipt of all cash orders. On all C. O. D. orders it will be mailed as soon as cash is received from the express agent.

ORDER TREES EARLY

Wherever you live it pays to order early. Send in your order just as soon as you know what you want. POMONA METHOD OF SHIPPING C. O. D., requiring no cash with order makes it convenient for you to do this, and we want you to get your trees and plant them as soon as weather conditions and the preparation of your land will permit, either spring or fall.

OUR SHIPPING SEASON

WE PACK AND SHIP ALL WINTER TO SOUTHERN STATES. Our regular Spring packing and shipping season usually opens here February 1st and continues into the month of May. The planting season is not regulated by any particular month or day, nor by the state of vegetation where the planting is to be done, but BY THE CONDITION OF THE TREES TO BE PLANTED. Hence, trees can be sent with safety from Dansville, N. Y., to localities several degrees south, even if they do not arrive until the ordinary transplanting season in that locality is past.

GUARANTEE

In the event that any nursery stock sold by us should prove untrue to name under which it is sold, we hereby agree, on proper proof of such untruthfulness to name, to rectify and replace the same or refund the purchase price. Except for such liability, and in respect to all nursery stock sold by us, we give no warranty, express or implied, as to description, quality, growth, productiveness or any other matter, and in case of error in variety the purchase price shall be the measure of damages, if order is accepted by us.

**WHEN POSSIBLE TO GROW BETTER
TREES POMONA WILL GROW THEM.**

Propagated Where the Best Trees Grow

Terms and Conditions of Sale

Safe Arrival Guaranteed.

Transportation Paid.

WE dig our trees as far as possible by steam power as illustrated. This enables us to secure good roots and tops which cannot be obtained by digging with horses and spade. We will not dig during hot or freezing weather. As soon as the trees are taken from the ground they are loaded on wagon and immediately taken to the packing house, graded and tied in bunches under cover, hence the roots are not exposed to the sun or wind.

**Our Trees
dug by
steam
power.**

**By this
method
you are
sure of
good roots.**

C. O. D. To enable you to avoid disappointment later, order now and we will reserve the varieties to be shipped C. O. D. at planting time and will require no cash with order.

TRANSPORTATION PREPAID. We prepay freight, express and postage as offered in catalog, so when buying from us you know just what the stock will cost F. O. B. your depot and you avoid paying high express and freight charges.

GUARANTEE. The writer's thirty-five years' experience in budding from bearing orchards, cultivating and working among the trees he grows and sells direct to the planter enables him to do his duty, certify and guarantee his trees true to name.

CERTIFIED. We welcome this idea: if one Dansville nurseryman's trees are certified correct, it makes Dansville-grown trees certified trees since all purchase buds more or less to propagate from one another.

CONDITION OF SALE. All stock sold by us will be of the grade indicated, strictly first quality, whole rooted (not piece root graft), clean, healthy, free from pest and diseases and shipped under the official certificate of a N. Y. State inspector.

RISKS. We take all risks and guarantee the delivery of stock in good condition. If not in first class condition upon arrival, notify us within 5 days after receipt of same and we will immediately forward new stock to replace.

FROST PROOF PACKING HOUSE, POMONA
UNITED NURSERIES

HOW TO REMIT. If you take advantage of our 6% discount and send cash with order remittance should be made by Check, Post Office Money Order, Express Money Order, Draft on New York Bank or Registered Letter. We disclaim all responsibility unless remittances are made as above directed.

**When possible to grow better
trees Pomona will grow them**

F. W. WELLS, PROP. POMONA UNITED NURSERIES
For thirty-eight years dealing direct with the planter at Wholesale Prices

PERSONAL SERVICE is the Foundation of Our SUCCESS

YES—FRIENDSHIP, GOOD FAITH, SINCERITY and PERSONAL SERVICE do exist in business. They are the foundations of one of the greatest nurseries of the twentieth century,—**POMONA UNITED NURSERIES.**

ARE YOU AN OLD FRIEND?

We again renew our pledge of honor to serve you as conscientiously and as earnestly as in the past. It is very gratifying to us in presenting this revised edition of our catalog to say that our business the past year exceeded our expectations several thousand dollars, which was due to the interest and friendly effort on the part of our friends and patrons among orchardists and fruit growers who have known of us for the past thirty-eight years, and we want to take this opportunity to thank one

and all who have favored us with their patronage in the past and to ask for a continuance of the same in the future.

ARE YOU A NEW FRIEND?

Then learn—today—now—all the advantages you secure through our high standards of **QUALITY** and **F. W. WELLS** interested **PERSONAL SERVICE.** A single order will afford you practical proof.

THIRTY-EIGHT YEARS DEALING DIRECT WITH THE PLANTER

For thirty-eight years, I have specialized along Horticultural lines. I have had the personal advice and assistance of the greatest and best of America's Horticultural Authorities, therefore believe I know much about the needs of the fruit growers at large and if you will kindly write me about varieties best adapted to your section I believe you will find my advice of interest to you. Let's talk it over, don't fail to ask questions but write me and I will assist you in starting on the road to success.—**F. W. WELLS, Prop. Pomona United Nurseries.**

POMONA TREES BACK TO PRE-WAR PRICES

We do not belong to any organization or group of nurserymen for holding up prices but sell direct to the planter at a **LIVE AND LET LIVE PRICE.** Compare **POMONA** prices with those of our responsible competitors and learn what you will save in ordering from us. In the fertile state of New York is probably no valley which is more famous in legend, more diversified in its agriculture, nor one possessing greater possibilities than that of the Genesee. It is in this famous valley that **POMONA TREES** are grown to perfection, and are known to make a more healthy and vigorous growth than those grown elsewhere.

FRESH DUG TREES

POMONA'S fresh dug trees are budded on the best whole rooted imported French stock, propagated by us from bearing orchards, free from disease, insect pests and true to name. Our **C. O. D.** offer enables you to take advantage of ordering now. Yesterday is gone, forget it. Today is here, use it. Never leave till tomorrow what you can do today.

Propagated Where the Best Trees Grow

We offer first quality stock, truthfully described, sell it reasonably, deliver it promptly and treat everyone fairly in every transaction.

SATISFIED CUSTOMERS EVERYWHERE ENDORSE OUR POLICY OF FAIR DEALING

Belleville, Pa., Oct. 20th.

Please send me fall catalog. I bought trees from you years ago. They are bearing fine every year. I never got finer trees in my life. They were fresh dug.

Wm. B. Kocer.

Ashland, Ky., Apr. 14th.

In 1916 I bought of you a lot of Nursery stock. It proved to be fine and is the pride of the home and admired by all who see it.

A. O'Neil.

Stony Point, N. Y., Feb. 18th.

I bought trees from you several years ago which are fine and fruiting, true to name.

H. O. Brooks.

Voorheesville, N. Y., Jan. 14.

Twelve years ago I bought trees of you which have given satisfaction. I will need more this spring.

M. Harner.

Mystic, Conn., Feb. 11th.

Please mail me catalog. Many years ago I bought a large number of your trees which have done well and are true to name.

W. A. Phillips.

Corydon, Ind., Feb. 6th.

Several years ago I bought trees of you which are bearing now and they are all right, true to name.

J. B. Danner.

Golden, Colo., Jan. 16th.

Ten years ago we purchased cherry trees from you which are True to Name and have been well satisfied both with their growth and productiveness.

Tegarden Bros.

Gasport, N. Y., Jan. 16th.

The last Peach orchard I planted I bought my trees from you. This was 8 years ago. All are true to name and have done fine.

W. Bugbee.

East Holden, Me., Apr. 4th.

Having placed an order with you in 1920 and was so well satisfied I am sending you another order this spring.

F. Sweet.

Port Crane, N. Y., March 26th.

For 9 years I have given you an order each year. Have received fine stock which is true to name.

E. Young.

Notwithstanding the fact that it is our policy to sell on a C. O. D. delivery basis we cheerfully refer you as to our responsibility to any bank or business man here in Dansville, or if desired we can doubtless refer you to customers in your vicinity.

The Planting and Care of Fruit Trees

CORRECT WAY TO PRUNE TREES FOR PLANTING

Pruning the Tree

Is a matter of great importance. The illustration here shows the correct way to trim for planting. Severe pruning may seem for a time to injure the appearance of the tree but this is the way to get proper results.

Planting

The hole must be large enough to receive the roots freely, without cramping or bending them from their natural position; the larger the better. Let the tree be the same depth it stood in the nursery (the old mark can be readily discerned) and not deeper, except in the case of dwarf trees. These latter should be set so that the point of union comes two or three inches below the surface of the ground. The tree being held upright, the finest and best earth from the surface should be carefully worked among the roots with the fingers, filling every space and bringing every root in contact

with it. Set the tree as firm as a post, thoroughly packing or stamping the earth.

Pruning Peach Trees After Planting

When growth starts, prune the peach trees to a whip, and cut them back to whatever height you desire your trees headed. We prefer heads not higher than 18 inches.

Number of Trees or Plants to an Acre. The following table will show how many trees or plants are required for an acre at any distance apart:

Distance	Square Method	Triangular Method
40 feet apart	27 trees	31 trees
35 feet apart	35 trees	40 trees
30 feet apart	50 trees	55 trees
25 feet apart	70 trees	80 trees
20 feet apart	110 trees	125 trees
18 feet apart	135 trees	155 trees
15 feet apart	195 trees	225 trees
12 feet apart	305 trees	350 trees
10 feet apart	435 trees	505 trees
8 feet apart	680 Plants	775 trees
6 feet apart	1,210 Plants	1,600 Plants
5 feet apart	1,745 Plants	2,010 Plants
4 feet apart	2,722 Plants	3,140 Plants
3 feet apart	4,840 Plants	5,590 Plants
1 foot apart	43,560 Plants	50,300 Plants

When Trees Arrive

When trees arrive, unpack at once, cut open the bundles and heel them in without any delay, each variety by itself. Be sure that the labels are carefully kept with each bundle. Do your work carefully and thoroughly. See that no water stands around where the trees are trenched. Dig a ditch leading off from where the trees are trenched, to carry the surface water off. Be careful to see that all straw and moss is removed from the trees before trenching. When unpacking and trenching, if the least bit dry, "puddle" the roots before heeling-in.

Preparing the Soil

For fruit trees the soil should be dry, either natural or made so by thorough drainage as trees will not live or thrive on a soil constantly saturated with water. It should also be well prepared beforehand by at least twice plowing, using the subsoil plow after the common one at the second plowing. On new fresh lands, manuring will be unnecessary; but on lands exhausted by cropping, fertilizers must be applied, either by turning in heavy crops of clover, or well rotted barnyard manure. To insure good growth of trees, land should be in as good condition as for a crop of wheat, corn or potatoes.

Labels

Labels should be removed and some other method adopted for recording varieties. The wires will cut and damage the limbs.

Mulching

When trees or bushes are planted, they should be mulched or covered with a layer of coarse manure or litter from three to six inches deep for a space of say, two feet more in diameter than the extent of the roots. This keeps the earth moist and at an even temperature,

All strictly first class stock well rooted and branched.

EVERY GARDEN HAS ROOM FOR THIS BARGAIN COLLECTION

Description of Cortland

THE fruit of Cortland is as large as that of McIntosh, or larger; round to somewhat conical in shape. In color it is a bright red blushed with darker red splashed and striped with carmine and more or less overlaid with a deep purplish bloom. The flesh is white, often with a pinkish tinge, fine, crisp, tender, juicy, subacid and aromatic. The trees are large, vigorous, upright-spreading, very hardy, productive and healthy. Fruits about three weeks later than McIntosh.

Winner of the Wilder Medal

To this remarkable new variety, originated at the New York agricultural experiment station, has been given the highest honors obtainable in the horticultural world. At its annual meeting in November, 1923, the American Pomological Society awarded to Cortland the Wilder silver medal for new fruits. To qualify for a Wilder medal a new fruit must exhibit superiority to all existing varieties with which it will compete and must show promise of commercial possibilities.

PRICE FOR CORTLAND APPLE

1 Year Trees, 90c each; 10 for \$8.50;
100 for \$75.00.

WILMA
NEW LATE PEACH

WILMA PEACH (REDUCED) FROM PHOTO BY GENEVA AGRICULTURAL EXPERIMENT STATION

THE new peach for which fruit growers of New York State have been looking has been discovered in the Wilma, a yellow-fleshed variety that rivals the favorite Elberta, say horticultural experts at the N. Y. State Agri. Exp. Station. The new variety gains double favor by ripening a week following the Elberta season. The fruit is as large as Elberta, about same color, and of better quality.

PRICE FOR NEW WILMA PEACH TREES, 5 to 6 ft., 75c each; 10 for \$7.00; 100 for \$50.00. 4 to 5 ft., 60c each; 10 for \$5.50; 100 for \$40.00. 3 to 4 ft., 50c each; 10 for \$4.50; 100 for \$35.00.

CONCORD GRAPE VINE (THE LEADING COMMERCIAL GRAPE)

Grafted Grape Vines

Yield Most and Grow Best

CAREFULLY conducted experiments over the past five years show that some kinds of grapes grow much better and return yields greatly in excess of the same varieties growing alongside on their own roots.

Not only is more fruit produced on the grafted plants, but the cluster and berry characters are much superior.

Vigor in the grape is largely determined by the ability of the root system to forage widely for soil moisture and plant food. The root stocks utilized in the propagation of the plants we are offering were chosen on this basis, together with the affinity of stock for scion. Thus good unions are secured.

These statements may be verified by a reference to N. Y. Agri. Station Bulletin No. 508.

No "Home Garden" should be without such grafted Grape Vines.

This Spring we are offering a limited number of strong number one vines of the following varieties grafted on the most congenial stocks.

Niagara White—Occupies the same position among the white varieties as Concord among the black; the leading profitable market sort. Bunch and berries large.

Campbell's Early (Black)—Strong grower, with large, healthy foliage; productive, its keeping and shipping qualities are equalled by no other early grape.

Worden (Black)—A splendid grape of the Concord type, larger, better quality and earlier. Vines vigorous, hardy and productive.

Concord—Large, good quality, early grape; exceptionally hardy and thrives in any grape belt. Widely known and well accepted as a market variety. Very productive and reliable.

POMONA PRICE for grafted Grape Vines, strong, No. 1, \$2.00 each, 4 for \$7.50.

POMONA'S PRICE FOR APPLE TREES

(Listed on the following pages)

BALDWIN APPLE ORCHARD

DON'T NEGLECT YOUR ORCHARD if you have one. If you haven't a respectable sized orchard on the place, don't stand in your own light any longer but set one out. The preserves, jams, marmalades, etc., that you enjoy so much through the fall and winter should remind you of the necessity of having a first-class and good-sized orchard.

The farmer who wants to enjoy life as he goes along can season from the earliest

raise fruit cheaper than he can buy it for he will want the fruit in its season from the earliest strawberry to the last of the winter apples until the strawberries come again. Fruit used in that way helps a man to enjoy life.

FRUIT ENOUGH AT LEAST FOR HOME CONSUMPTION

WE ALWAYS FEEL that the farmer who is not growing his own fruit is losing much profit and pleasure. We do not mean that every place should have its own commercial orchard—far from it. Commercial fruit growing, like stock-raising, is a profession in itself. But there is a certain broadening in the pleasures one may get from his own acres, something that will go far toward making one feel the real country gentleman of wide interests, in having the farm or place produce in abundance its own fruit for all seasons, and this it is which makes the farm.

There is plenty of evidence that the home orchard, like the home vegetable garden, up to the limit of home consumption, is one of the best investments it is possible to make. There should be fruit enough, in both quantity and variety, to meet all the needs of every family.

POMONA LOW PRICE FOR ALL VARIETIES OF APPLE TREES

The Apple is the King of Fruits

WHILE there are many tempting fruits which nearly every person in this country can grow in his field or garden, the apple has been proclaimed king of all, since it is so healthful, can be so easily grown, and can be used in so many ways. Years ago it was feared that apple growing would be overdone, but since then millions of trees have been planted in various states and the demand today is better than ever before. There can be no surplus of superior fruits in this country. Whereas in old times an apple orchard of five or ten acres was considered a large planting, now orchards of one hundred, five hundred, eight hundred or a thousand acres are frequently found. Apple growing is now a business, whereas in former years it was simply a small side issue. Those who have good orchard lands, and there are thousands of acres of such lands in almost every township in each state, can devote their land to no more profitable use than by planting orchards. Our list of varieties embraces a selection of the best for the several seasons, that have proved worthy of general cultivation.

RED ASTRACHAN—THE BEST EARLY DESSERT APPLE

Summer Varieties

RED ASTRACHAN—This hardy early variety is well known. Fruit large, roundish, nearly covered with deep crimson, handsome, juicy, good, highly esteemed on account of its fine appearance, earliness, and hardiness. Aug.

Carolina Red June—Small or medium, deep red, quality good. Tree hardy and a fine grower. August.

Williams Favorite—A bright red apple of mild, agreeable flavor. Aug. to Sept.

Early Harvest—Medium, pale yellow, tender, juicy. Excellent for orchard and garden; one of the first to ripen. Last of Aug.

YELLOW TRANSPARENT—Early variety. Tree an upright grower and a very early and abundant bearer. Fruit of good size; skin clear white, turning to a pale yellow; flavor acid and very good. Ripens from ten days to two weeks earlier than Early Harvest.

YELLOW TRANSPARENT

Autumn Varieties of Apples

DOING ITS FULL DUTY—DUCHESS APPLE, HARDY AND PRODUCTIVE

DUCHESS OF OLDENBURG—Large, round; streaked red on yellow; tender, juicy, pleasant; a kitchen apple of best quality and esteemed by many for dessert. Tree a vigorous, fine grower, and an abundant bearer. Succeeds well in the Northwest, where most varieties fail. We find Duchess the most valuable commercial variety, a sure cropper, hardy as an oak, having survived in some instances when all others died. August and September.

Gravenstein—An apple of excellent quality. For culinary purposes it is perhaps unexcelled by any variety of its season. Fruit large and uniform in size, skin thin, tender, greenish-yellow overlaid with dark red. Sept.

Fall Pippin—Very large, roundish, oblong, yellow; flesh tender, rich and delicious. Tree is a free grower, spreading, and fine bearer. One of the most valuable varieties for table or market. Extensively grown in Western New York. October.

Maiden's Blush—Medium, pale yellow, red cheek, fine quality, sub-acid. October.

FAMEUSE—THE BEST LATE FALL APPLE

FOR PLANTERS EVERYWHERE

Resolved: To build my own house, to beautify it with Pomona's trees, shrubs and roses; to give it within and without the character of my own thought and taste; to live in it, to love it and to make of it a new strong bond of affection between me and mine.

Fameuse (Snow Apple)—Hardy. Deep crimson; flesh is snowy white, tender, melting and delicious. One of the finest dessert fruits, and valuable for market; succeeds particularly well in the North. Nov. to Jan.

Winter Varieties of Apples

WEALTHY A Michigan Fruit Grower writes that from 450 **ORCHARD** trees 5 years planted he sold \$490 worth of fruit

WEALTHY—This is a beautiful, hardy winter apple, originating in Minnesota. Fruit large, roundish; skin smooth, oily, covered with a dark red. Flesh white, tender, juicy, vinous, sub-acid; quality very good. This is one of the few most desirable varieties for Minnesota, Wisconsin, Iowa, Nebraska, as well as the Eastern and Middle States. In season it differs somewhat, according to locality; in New York and neighboring states its season is December to February, and owing to its early bearing qualities it is planted largely as a filler.

THE RELIABLE R. I. GREENING APPLE

RHODE ISLAND GREENING—This large and superior winter apple is famous over a large extent of country, and is more highly prized for cooking and eating than any other variety. It is a good keeper but will keep better if picked early. This Greening is a beautiful yellow color when ripe, and is a most abundant yielder. March to April.

Freight and Express Charges Paid on All Orders of \$10.00 and Over to States Listed in Catalogue.

McINTOSH, DOING ITS FULL DUTY, HIGHEST QUALITY, HARDY AND PRODUCTIVE

McINTOSH—Not equalled in quality and flavor by any other variety. Due to its very high quality and its exceedingly attractive appearance, it commands a ready sale and a fancy price in all the large eastern markets. Has held the record for high price for years in the Boston, New York, and Chicago markets. Rapidly making a place for itself as one of the leading if not the leading commercial apple of the east. The fruit is very attractive in appearance, of bright deep red color, which in highly colored specimens is almost purplish-red overspread with a thin lilac bloom. Fruit above medium in size, flesh white, firm, very crisp, fine grained, tender, very juicy. Sprightly subacid in flavor with a characteristic perfume and aroma. The tree is rather a strong grower, very hardy and healthy. Comes into bearing about the fourth year and is a reliable cropper, yielding good crops biennially and sometimes annually. We recommend it highly to eastern orchardists. In season from October to December or later.

Twenty Ounce. Very large; greenish, becoming yellow, mottled and splashed with bright red. Flesh tender and juicy. September.

Spitzenburg—Large, deep red with gray spots, and delicately coated with bloom; flesh yellow, crisp, rich and excellent. Nov. to April.

**I Will
Plant
a few
Trees:
Quality
Tells**

DELICIOUS RED APPLE—VERY PRODUCTIVE. HIGHLY SPOKEN OF BY LEADING FRUIT GROWERS

DELICIOUS RED—This apple is appropriately named for it is of handsome appearance as well as high quality, rivaling Spitzenburg. It is oblong in shape and its bright red and yellow skin is very handsome. This apple has been largely planted in the Northwest and ranks high in commercial orcharding. Since it has made good in the apple growing sections someone has said it is a gem. It is the best in quality of any apple I have tasted. Everyone should plant one or more trees.

Propagated Where the Best Trees Grow

THE POPULAR ROME BEAUTY, HARDY AND PRODUCTIVE

ROME BEAUTY—Keeps in good condition till May and June. Large, round, mottled and striped in different shades of red; flavor and quality away above the average; appearance and size are its valuable points; always sells and always brings good prices. With an established reputation due to real merit, Rome Beauty is a variety Eastern orchardists should plant largely. Good grower, blooms late, bears heavily every year, is adapted to a wide range of soils, elevations and conditions. In Ohio, Pennsylvania, New York and West Virginia will make more money than some of the sorts which are now a large part of the total number of trees in commercial orchards. Reliability, due to being frost-proof, strong-growing and sure bearing make it a favorite with the grower. Fine quality for use and for handling makes it popular with consumers and dealers. When packed in boxes shows up splendidly.

Roxbury Russet—Medium to large. Surface rough, greenish covered with russet. Tree free grower, spreading; a great bearer. Keeps until June.

STAYMAN'S WINESAP—Fruit medium, large; skin green and yellow, red-striped, flesh yellow, firm; quality excellent.

Jacob Sweet—A large showy apple, green or yellowish, often with bright blush. One of the best sweet apples. October to April.

Gilliflower (Black)—An old dessert apple; tree a good vigorous grower and a reliable cropper. October to February.

Mammoth Black Twig—The tree is a strong grower, a regular and abundant bearer. A good winter apple. Deep red; sub-acid, very high flavored.

Stark—Fruit large, roundish; skin greenish yellow, much shaded with light and red, and sprinkled with brown spots; flesh yellowish. January to May.

Tolman Sweet—Season, winter. Medium to large size; color, light yellow; flesh, white, firm, rich, and very sweet. Excellent for winter baking. A late, well known favorite.

Smoke House—This grand apple is a great favorite in Pennsylvania and doesn't seem to be known much elsewhere. Tree a vigorous grower, healthy, hardy and reliable cropper. The fruit hangs well to the tree and is of good color and quality. October to March.

Wagener—Medium to large; deep red in the sun; flesh firm, sub-acid, and excellent; very productive, bears very young. Dec. to May.

THE FULL HARVEST, BALDWIN APPLE TREE

BALDWIN. A great market apple, very productive of fair handsome fruit. No variety yields larger crops or bears shipment better, or is more attractive in color, size and shape, than the Baldwin. It is esteemed as an eating apple, and for cooking. Thousands of barrels of this fruit are exported to England annually. For a commercial orchard it can be relied upon. Large, bright red, crisp, juicy and rich; tree vigorous, upright and productive. In New England, New York, Ontario and Michigan, this is one of the most popular and profitable sorts for table or market. Dec. to Mar.

King of Tompkins County. One of the standard varieties grown for commercial purposes, and gives the greatest satisfaction when top-worked on some hardier variety. The fruit is of a bright red color, large and uniform. The flesh is yellowish, crisp, tender, juicy and sub-acid, and of the best quality.

GRIMES' GOLDEN. Medium to large size; skin golden yellow, sprinkled with gray dots; flesh crisp, tender, juicy, sprightly, very good to best. Grown in the South and Southwest. Jan. to Apr.

York Imperial. A fine, hardy, large, red apple; succeeds over a wide range of country. A fine market sort, bringing highest prices. Fruit large, oblong, smooth, skin yellow and nearly covered with light to dark red; flesh yellow, juicy, firm, sub-acid, good. Nov. to Feb.

WINTER BANANA—Perfect in form; golden yellow, and beautifully shaded with bright crimson red; flesh lemon-yellow, fine grained, sub-acid, rich, aromatic flavor, and of the highest quality. Nov. to Jan.

JONATHAN—A beautiful red apple, highly flavored and of excellent quality, being tender, juicy, spicy, and rich—a splendid family sort and highly profitable for market. Productive. November to April.

Yellow Belleflower—A hardy apple of large size, a beautiful golden color, often with red blush; conical in shape. Flesh very tender and fine grained, crisp, juicy, sub-acid, of excellent quality. October to February.

Pumpkin Sweet. (Pound Sweet.)—A fine, large, yellow sweet apple. Excellent for baking or stewing. October to January.

NORTHERN SPY APPLE, LONG A STANDARD IN NORTHERN LATITUDES

This cut of beautiful Northern Spy Apples shows how perfectly these may be grown, with proper care. This variety has long been a favorite in commercial sorts in northern New England, New York, Michigan, etc. It is superior to some other standard varieties in flavor and quality and commands top prices. Large, striped and quite covered on the sunny side with dark crimson; and delicately coated with bloom. Juicy, rich, highly aromatic, retaining its freshness of appearance and flavor till July. A remarkably rapid, erect grower, and a great bearer. One of the finest late keeping apples. December to March.

Seek-No-Further—Medium to large, slightly russeted with dull red stripes; tender, rich, spicy and fine; good grower and bearer November to February.

N. W. GREENING—A hardy winter apple of very large size, much larger than R. I. Greening. This apple is highly prized in localities where the R. I. Greening will not succeed.

Hubbardston Nonesuch—Fruit large, roundish; color bright red or yellow skin; flesh yellow, with a fine, rich, aromatic flavor, sub-acid. November to January.

Golden Russet—Medium to large size, dull russet, with a tinge of red on the exposed side; flesh greenish, crisp, juicy, and high flavored; hardy, bears well. November.

Select Varieties of Crab Apples

AS an ornamental fruit, and for jellies and preserving, the crab apple is unequalled. All are very hardy and prolific, come into bearing when very young, and command a ready and profitable market. I name the best sorts.

Transcendent—A beautiful variety of the Siberian Crab; red and yellow. Tree a remarkably strong grower. September.

HYSLOP'S—Almost as large as the Early Strawberry Apple; deep crimson; very popular in the West on account of its large size, beauty, and hardiness. Tree remarkably vigorous. October.

General Grant—Large, round, yellow, covered with stripes of red, and when exposed to the sun, turning quite dark; flesh white, fine grained, a good grower, hardy and productive.

Whitney—Large, averaging one and a half to two inches in diameter; skin smooth, glossy green, striped, splashed with carmine; flesh firm, juicy and flavor very pleasant.

POMONA'S PRICE FOR PEACH TREES

(Listed on the following pages)

ELBERTA LEADS ALL OTHER VARIETIES IN
NUMBER OF TREES PLANTED

PEACH TREES are easily cultivated. Their comparative freedom from disease, the short period before they become productive, with the immense demand for the fruit and the facilities with which it may be shipped to distant markets, make peach growing extremely profitable, and there are few kinds of fruits more highly prized and more keenly relished.

To secure healthy, vigorous and fruitful trees, the ground must be kept clean and mellow and it should receive an occasional dressing of wood ashes. It should be remembered that peaches are all borne on wood of the previous season's growth, and that this makes it absolutely necessary to prune the trees yearly, to remove dead branches and let in light and air, and keep the trees in good shape to produce bearing wood.

SATISFACTION ALWAYS

Greensburg, Ind., April 4, 1925.

Pomona United Nurseries:

I have bought trees from you during the last 15 years and have been well satisfied and delighted with the trees you have supplied which are fruiting and growing fine.

Very truly yours,

J. C. Eisenman.

Huntingdon, Pa., May 26, 1925.

Pomona United Nurseries:

Just to express my thanks for the fine trees you sent me, and I am sure that my friends will make no mistake in ordering from POMONA, as I have found it to be the most reliable nursery I have ever ordered anything from, and fairer treatment could not be expected from anyone.

Very truly yours,

George L. Davis.

Fairmont, W. Va., Feb. 26, 1925.

Pomona United Nurseries:

Eight years ago I got a Peach orchard of 100 trees from you which are the finest and healthiest trees I ever purchased. All living but one at present.

Very truly yours,

Bertha Stiles.

Propagated Where the Best Trees Grow

NIAGARA PEACHES (REDUCED)

NIAGARA PEACH—One of the best medium early yellow peaches that has been introduced for many years past is the Niagara. It originated in Niagara county, New York, and has been grown there for about ten years past, but only in a small way, until very lately. The fruit of the Niagara peach is much like that of Early Crawford in appearance, being large, oval, yellow with brilliant red cheeks. The flavor is rich and piquant, reminding one of the very best peaches he ever ate. The season is medium early, coming in just before Elberta.

Foster—Large, deep orange red, becoming very dark red on the sunny side; flesh yellow, very rich and juicy.

Matthews' Beauty. Fruit large; ripens two weeks later than Elberta. Skin golden yellow, streaked with red; flesh yellow, firm, excellent flavor. Perfect freestone.

Hill's Chili—Medium; deep yellow shaded with dark red. Hardy, vigorous and productive. Good market variety. First of September.

Crosby Frost-Proof Peach—A fine, handsome, yellow peach, with remarkably small pit, that bears regular crops north of the peach belt. Quality delicious; season follows quickly after Early Crawford. Crosby is now so well known that it will be no experiment planting it.

Beer's Smock—Large, yellow, with red cheek; flesh yellow and of the very best quality for the season; a regular and enormous bearer, making it very desirable for market purposes. Ripens a few days later than Smock. The tree is a strong upright grower, hardy and free from diseases. September.

LEADING VARIETIES—For the convenience of our customers who may not be entirely familiar with the best and most profitable varieties, we have given full description of such sorts in black face type. In making your selection, it will pay you to choose from among those varieties.

J. H. HALE PEACH (REDUCED)

EARLY CRAWFORD PEACHES (REDUCED)

CRAWFORD'S EARLY—A magnificent large yellow peach of good quality. Tree vigorous and prolific; its size, beauty and productiveness make it one of the most popular varieties. Season beginning of September. This valuable peach has long been a favorite for large size, beauty and quality of fruit. Most people when they buy peaches ask for Crawford's, knowing but little about any other variety.

Belle of Georgia—Large; white, with red cheek; flesh white, firm and of excellent flavor. Tree a rapid grower and very productive. Early July.

J. H. HALE (Yellow, Freestone)—A notable variety of recent introduction, unusually large in size of fruit and very handsome. Largely advertised as a rival to Elberta for commercial honors, but reported in many sections as not prolific enough to compete with that grand old variety. Of a deep golden-yellow color overlaid with bright carmine. Flesh firm, fine-grained and good in quality.

Chair's Choice—Deep yellow, with red cheek; flesh yellow and very firm. Oct.

New Prolific—Large; attractive, flesh yellow, fine flavor, hardy and productive. Sept.

Kalamazoo—Large, golden yellow, with crimson cheek; flesh thick yellow, superb quality, small pit. Strong grower, early bearer, hardy and productive.

Salway—Large; deep yellow, red cheek. Flesh yellow, juicy. October.

CRAWFORD'S LATE—Of large size; skin yellow or greenish yellow, with dull red cheek; flesh yellow. Tree vigorous; moderately productive; one of the finest late sorts. Last of September.

Engle's Mammoth—Large, round, suture slight; yellow with red cheek; flesh yellow, stone small, free; sweet, rich, juicy.

CHAMPION—Tree and fruit buds extremely hardy—has stood eighteen degrees below zero and produced a full crop the following summer. The flavor is delicious, sweet, rich and juicy; skin creamy white with red cheek, strikingly handsome. A good shipper. Last of August.

CHAMPION PEACH—CREAMY WHITE FREESTONE

Propagated Where the Best Trees Grow

ELBERTA—AMERICA'S GREATEST SHIPPING, MARKET AND CANNING PEACH

Wager—Medium yellow, good quality. Tree hardy and productive. A profitable late variety. Last of September.

Carman—A very hardy peach, ripening at same time as Early Rivers, yet almost as large as Elberta. Skin pale yellow with blush on sunny side; flesh white, tender, sweet and melting. Ships well. August.

Hiley—A large, early, white peach highly colored on sun-exposed side. A profitable commercial variety, very hardy in wood and bud.

Crosby—A remarkably fine peach for the home use or market. Ripens just before Crawford's Late. Middle of September.

Gold Drop—Medium size; hardy, very productive, quality the best, early bearer. Last of September.

ROCHESTER (Yellow, Freestone)—A remarkable new early peach which seems to combine the high quality of the Early Crawford with the productiveness of the Elberta. Generally recognized as the best early variety. Coming into the market as it does about two weeks ahead of Early Crawford, it commands not only the highest price but a ready sale. An early bearer, often producing fruit the year after planting. Not only an ideal home orchard variety but an excellent commercial peach as well. Makes a great combination with Elberta. The fruit is large, yellow mottled with red in color, with thick, firm, juicy flesh, rich and sweet in flavor. The trees are hardy, vigorous and productive. Ripens here the middle of August.

ELBERTA—A valuable, large peach of good quality. The best orchard variety, and valuable also for planting in the garden. Elberta is hardier in bud than many varieties, therefore a more uniform cropper. Elberta is large, yellow, with red cheek, juicy and high-flavored, flesh yellow; freestone. Season medium early, following quickly upon Early Crawford.

ROCHESTER EARLY YELLOW PEACH

POMONA'S PRICE FOR SOUR CHERRY TREES

(Listed on the following pages)

WHAT'S MORE ATTRACTIVE THAN A CHERRY ORCHARD IN FULL BLOOM

WE CONSIDER CHERRY ORCHARDS the most profitable of any fruit. The trees begin to bear two years after planting, growing rapidly so that in a short time you are able to realize handsomely on them. By arranging varieties the time of ripening can be lengthened out through June, July and August, thus enabling the planter to harvest the crop to best advantage.

The absence of Sour Cherries and the small amount of sweet kinds offered in our markets is becoming more noticeable every year. Why, we do not know, considering the desirability of this fruit. In some sections there were more cherries grown twenty years ago than there are now.

BEST STOCK OBTAINABLE FROM NURSERYMAN, NOT FROM TREE AGENT

GOOD nursery stock of suitable kinds and varieties is fundamental to success in fruit growing. The average small planter is not in direct touch with nurserymen. He is more often visited by a traveling "FRUIT TREE AGENT," who may or may not represent reputable nursery, and who may or may not know the merits of different varieties and their adaptability to different conditions and regions. Instead of the planter, who should know what he wants and should place his order accordingly, the agent too often selects the kinds and varieties. Not infrequently a tree agent's visit brings the first suggestion that some fruit trees may be planted, and then the grower perhaps is induced to include in the order which he gives the agent some high-priced novelties whose value is uncertain and whose adaptability to the conditions where they are to be planted is entirely unknown. It is better, as a rule, *for a grower to deal directly with a nurseryman rather than through an agent.*—Farmer's Bulletin, No. 1001, U. S. Dept. of Agriculture.

Select Varieties of Sour Cherries

EARLY RICHMOND CHERRIES (REDUCED SIZE)

EARLY RICHMOND—One of the most valuable and popular cherries, unsurpassed for cooking purposes. It is the good old variety that yields such marvelous crops in the gardens. The most hardy of all varieties, uninjured by the coldest winters. Tree slender in growth, with a roundish spreading head, exceedingly productive. Ripens through June. The cherry tree bears almost every year, and is an easy fruiter. For many years Dansville has been the largest cherry growing section of the U. S., while the majority of nurserymen are buyers instead of growers. The cherry is greatly improved by cultivation and the use of fertilizers. Fertilizers make the tree vigorous and fruit less liable to decay.

ENGLISH MORELLO—A VALUABLE LATE CHERRY

ENGLISH MORELLO—Without doubt one of the most valuable of this class. English Morello is late and much liked by canning establishments. It is one of the few varieties that seems to succeed well with neglect. Birds do not bother it, May bugs shun it, rot is unknown to it, and all in all it is one of the safest cherries to plant.

Select Varieties of Sour Cherries

THE CHERRY grows best on gravelly soil, and there attains its highest perfection, but will do very well in almost any situation except a wet one. It is one of the most ornamental of all fruit trees which, with its delicious and refreshing fruit, makes it very desirable for planting near the dwelling, where beauty and shade, as well as fruit, are so desirable.

THE MOST POPULAR CHERRY, LARGE MONTMORENCY, HARDY AND PRODUCTIVE

MONTMORENCY (Large)—The most popular of all hardy cherries for market and home use. This cherry is planted largely in all parts of the country. The fruit is in great demand by canning factories and others, and sells at fancy prices. Montmorency has been growing in popularity all over the country each year, so that it has been almost impossible to grow trees fast enough to keep up with the demand. It is of large size, light red in color, stem rather short. The tree is very hardy and a vigorous grower. The trees bear fruit soon after planting. I visited a friend last summer who has a large orchard of Montmorency cherries in bearing. The trees have been planted only a few years, and yet they were laden with the most beautiful fruit.

Baldwin—Of the Morello type; round, slightly sub-acid, sweetest and richest. A fine upright grower, remarkable for earliness, hardness and productiveness. June.

Dyehouse—A very early and sure bearer, ripens a week before Early Richmond. For tarts, pies and canning it has no equal for home use. June.

Wragg—A Russian variety. One of the hardiest cherries, vigorous and productive, medium size, dark purple, fine quality and has produced annual crops at the northern-most limit.

Osthme—Very hardy, fruit large and roundish. Flesh is liver colored, tender, juicy and almost sweet, although a sub-acid cherry. Quality good. Middle of July.

Olivet—A tree of this variety should be in every garden. The fruit is very large, has a shining deep red color; tender, mild sub-acid flavor. Finest table and canning cherry you can get. Ripens in June.

May Duke—Large red; juicy and rich; an old, excellent variety; vigorous, productive. June 15.

MAY DUKE (REDUCED) (EARLY CHERRY)
VERY PRODUCTIVE

Propagated Where the Best Trees Grow

Select Varieties and Prices of Sweet Cherries

THE fruit of which is heart-shaped with tender, sweet flesh and the trees rapid growers. With my experience in growing cherries I by all means urge every owner of a home with a little space to plant Sweet Cherry Trees. No fruit is more liked by members of the family than this delightful fruit when fresh picked, stewed or preserved.

NAPOLEON (WHITE OXHEART) CHERRY (REDUCED ONE HALF)

NAPOLEON CHERRY (White Oxheart)—Fruit very large, oblong, pale yellow, with a bright red cheek in the sun. Flesh very hardy, brittle, reddish at stone, juicy, and sweet. Tree a vigorous and erect grower, very productive. Early in July.

Bing—One of the most delicious Sweet Cherries grown. Tree very hardy and vigorous with heavy foliage. It succeeds in the East better than most sweet varieties. Fruit is large, dark brown or black and of very fine quality. Bing is a good shipper and should be planted with Lambert for commercial purposes.

BLACK TARTARIAN (Black Oxheart)—Very large; bright purplish black; half tender; juicy, very rich. Tree a remarkably vigorous and erect grower, and an immense bearer. One of the most popular varieties in all parts of the country. Ripe last of June.

Yellow Spanish—Large, pale yellow, with red cheek firm, juicy and excellent, one of the best light colored cherries; productive. Last of June.

Black Heart (Black Oxheart)—An old variety; deep black; flesh tender, juicy, sweet. July.

Gov. Wood—One of the best. Clear, light red; tender and delicious. Tree vigorous and productive. End of June.

Windsor—Fruit large; liver colored, resembling the Elkhorn, ripening a few days after that variety; flesh remarkably firm, of fine quality. Tree hardy and prolific. Vigorous. Middle of July.

Lambert—A valuable Sweet Cherry of the largest size. Skin dark purplish red, almost jet-black when ripe. Flesh firm, rich and juicy. Tree hardy, a strong grower and an enormous bearer.

Royal Ann (Napoleon)—A valuable cherry of the largest size. Pale yellow, with bright red cheek; very firm, juicy and sweet; valuable for canning.

Schmidt's Bigarreau—Black; flesh dark, firm. Very productive. Is one of the best firm fleshed cherries of the largest size. July.

POMONA'S PRICE FOR PLUM TREES

(Listed on the following pages)

THE PLUM does best on a strong, clay soil, where it grows the most thriftily, and as is the case with all other fruits, it is greatly benefited by thorough cultivation.

Plums are hardy and grow vigorously in nearly all sections, succeeding on any soil that grows good corn or potatoes. Plum trees are planted about as far apart as peaches; that is, from 15 to 18 feet apart each way. Many growers prefer to plant them closer one way than the other, and eventually to stop cultivation in one direction. If this system is used they may be placed 18 to 20 feet apart one way, and from 10 to 12 feet the other way. The trees are pruned the same way that apple trees are when planted.

UPLAND GROWN

OUR TREES are grown in the highlands of the Upper Genesee Valley. This land is deep, mellow, heavy and rich—produces trees with deep roots, well branched and hardy. The best means that modern nursery practice commands have been used by us in developing the land to the highest state of fertility. Our trees show the result of these long years of experience. Leading orchardists everywhere declare that our soils are the best in the world for growing nursery stock.

RECORD

THIRTY EIGHT YEARS abroad and at home throughout the country for integrity and fair dealing still stands any test. A trial order from you will show you how promptly, courteously and efficiently we serve our customers.

Clearfield, Pa., March 2, 1925.

Pomona United Nurseries:

I was well pleased with the order for trees and Grape Vines. All are bearing now and just as you said they would be.

Very truly yours,

A. E. Parrish.

RED JUNE, THE BEST JAPAN PLUM

RED JUNE—A consensus of the opinions of those who have had actual experience with the variety shows that it closely follows Abundance and Burbank in popularity. The color is a mottled garnet-red overlaid with thin but very distinct and delicate bloom. Ripens early in July.

Tatge—Evidently a seedling of the Lombard. Is larger, more nearly round, darker color and finer quality than that well known and excellent variety. Claimed to be the most productive and longest-lived plum known.

Wickson—Fruit remarkably handsome, very large, long, heart-shaped, color deep maroon red covered with white bloom; flesh firm and meaty, yellow, rich and aromatic; cling; pit small. Tree an upright vigorous grower. Excellent keeper and shipper, is being planted largely for market. Early Sept.

Niagara—Of large size and first rate flavor; color dark blue. Good bearer; not liable to rot. Ripens about Aug. 1.

German Prune—Of medium size; oval; purple or blue; rich, juicy, fine. Tree vigorous and very productive. Sept.

GERMAN PRUNE

LOMBARD PLUMS—TREE HARDY AND PRODUCTIVE

LOMBARD PLUM TREE

3rd season after planting, 2 baskets to the tree

LOMBARD (Purple)—A great favorite as it adapts itself to widely different soils and climates and does well where other varieties would not thrive. Robust, healthy, productive and a regular bearer. Extremely hardy. Not of the very highest quality, but does very well for canning, cooking and preserving. Skin dark purplish red overspread with a thick bloom. Flesh yellowish, firm and sweet. Freestone. Ripens in late August.

Abundance—Has been in America a quarter of a century. The chief asset, which has given the variety its great popularity, is its name, abundance in fruit. Tree bears early in season being a pinkish red changing to a darker red mottled with thin bloom. August.

Bradshaw—Leads all other plums in number of trees, according to a survey of the leading orchards. The trees grow large and well formed, bear regularly and heavily. The plums are large, attractive in appearance, being a light purplish red changing to dark reddish at maturity, which occurs in July.

Burbank—Is handsomely colored dark red over a yellow ground. It is a very desirable variety for home plantations in New York, bearing early in July.

Washington—This is one of the finest and most popular plums. Fruit very large, roundish oval; skin yellow, with a slight crimson blush in well ripened specimen; flesh very sweet. Tree vigorous and very productive. Last of Aug.

PLUM COLLECTION NO. 7

5 Selected Trees for \$2.35

1 Monarch	1 Lombard
1 Red June	1 Niagara
1 York State Prune	

5 Trees, 2 Yr. 5-6 Ft. high (express) \$2.35

Propagated Where the Best Trees Grow

Thanksgiving Prune—Very productive, good quality and long keeper. October.

Yellow Egg—Golden yellow covered with thick bloom. Flesh golden yellow. Rather juicy. Tree large, very productive. Sept.

Reine Claude. (Bavay's Green Gage)—Roundish, oval, greenish, marked with red in the sun; a great favorite. September.

Felleberg—A fine late prune; oval, purple; flesh juicy and delicious. September.

Shropshire Damson—Fruit oval; tree a good grower and enormously productive; fruit of medium size produced in thick clusters or groups, dark purple color, esteemed for preserving. October.

Pond's Seedling—A magnificent plum; light red, changing to violet; flesh rather coarse. Tree a vigorous grower and most abundant bearer. One of the most attractive in cultivation. September.

Moore's Arctic—Skin purplish black, with a thin blue bloom; flesh greenish yellow, juicy, sweet and of pleasant flavor. "The hardest plum grown, and free from black knot." Tree healthy, vigorous; an early and abundant bearer. September.

Yellow Gage—Fruit large, flesh deep yellow, rich, sugary and melting. Tree very vigorous and productive. Middle of August.

Shipper's Pride—Very productive, the original tree having never failed to produce a good crop since it was old enough to bear. Fruit of large size and nearly round; color handsome dark purple; quality fine, juicy and sweet; excellent for canning and an unusually good shipper. Middle of Sept.

MONARCH, A LARGE HANDSOME PLUM

MONARCH—A very handsome, large, rich, purple plum that has attained popularity more quickly than any other plum of recent introduction. Flesh golden yellow, juicy and sweet. Trees hardy and productive. Ripens in October.

Geull—Fruit large, roundish, oval; skin dark purple, covered with thick blue bloom; flesh yellow.

Grand Duke—Fruit oval with a short neck. Skin dark, almost a darkish purple.

YORK STATE PRUNE—A superior strain of the German Prune. Known in some sections as Felleberg or Italian prune. The most widely grown of all plums. In our opinion the most profitable prune for orchard purposes and a variety that should be in every home garden. It is finely flavored whether eaten out of hand, stewed or cured as a prune. In cooking it changes to a dark wine color, very attractive in appearance, with a most pleasant sprightly flavor. The trees are large, hardy, productive, well formed and bear regularly. Purplish black overspread with a thick bloom. Flesh yellow, juicy and of best quality. Freestone. Keeps and ships well. Ripens here in September.

YORK STATE, THE LARGEST AND LEADING PRUNE

QUALITY IS OUR FIRST CONSIDERATION

The price is a matter for your decision

POMONA'S PRICE FOR STANDARD PEAR TREES

(Listed on the following pages)

BARTLETT PEAR ORCHARD 5 YEARS AFTER PLANTING

Every
Garden
has room
for a
Bartlett
Pear Tree

THE HOME GARDEN is not complete without pears and they are a very profitable commercial crop in nearly all parts of the country. Pears will live on a variety of soils, but succeed exceptionally well in a hard clay soil. Tilling and fertilizing are advisable to a certain extent, but should not be carried far enough to produce too vigorous a growth. The quality of the pear is much improved by picking before maturity and by proper ripening indoors.

TWENTY YEARS OUT OF DATE.

TWENTY YEARS out of date is the old method of buying trees from colored pictures. Ask any experienced orchardist about this. The highly colored pictures of the fruit tree agent and picture catalogue appeal to the eye, excite your imagination, but like a moving picture show, they are unreal. They have been gotten up by high priced picture painters, writers, advertisers—men who never grew a tree in their lives.

Pomona appeals to your intelligence and reason, we urge you to plant fruit trees for profit, we aim to give our patrons the latest word on the behavior of any variety in any section. This service is free for the asking. We will spare no effort to send you the fullest information concerning the best varieties. 38 years experience enables us to do this.

Propagated Where the Best Trees Grow

BARTLETT KING OF STANDARD PEAR TREES—PLANT THEM

BARTLETT—Large, coloring when fully ripe to waxy yellow with red blush; juicy, melting, highly flavored. The tree bears early and abundantly. May be grown either as dwarf or standard, but succeeds best as standard. Aside from the fact that it bears early, regularly and abundantly, the Bartlett pear is justly popular on account of its size, beauty and excellence. It originated in Berkshire, Eng., about 1770. When introduced to this country its name was lost. Since it was cultivated and discriminated by Enoch Bartlett, it became universally known as the Bartlett. Aug. and Sept.

Flemish Beauty—Large size; greenish yellow and brown; rich and juicy. An old and highly esteemed variety; a strong grower and a great bearer; hardy and desirable. Fruit almost covered with light russet, becoming reddish-brown when ripe. Large, beautiful,

melting, sweet and rich. Tree is very hardy but needs sunny situations. When perfect it is a superb pear. Considered one of the hardiest and best for Montana and the Northwest. Sept. to Oct.

Seckel—Small size; yellowish russet, with red cheek; flesh whitish, buttery, very juicy and melting. The richest and finest variety known and extensively planted all over the country. A prolific bearer. Sept. to Oct.

Jacksonville, Ill., Oct. 29, 1925
Pomona United Nurseries,

Please send me your catalogue. The Fruit from trees bought of you took the first premium at the Morgan County Fair.

Very truly yours,
C. O. Bayha.

More in
Business
than Dol-
lars and
Profit. We
would
rather
make a
friend than
two sales.

KIEFFER PEARS

Kieffer—Large to very large, skin yellow, with a light vermillion cheek; flesh brittle, very juicy, with a marked musky aroma; good quality. It is unfortunate that the merits of this fruit have been underestimated from the haste in which it is hurried to market in an immature condition, and often before it has attained the proper size. When allowed to hang upon the trees until the beginning of October, and then carefully ripened in a

cool, dark room, there are few pears which are more attractive.

Sheldon—Large size; roundish; greenish yellow, cheek; a vigorous and strong grower and a good bearer while quite young. Oct. to Nov.

Duchess d' Angouleme—very large; of greenish yellow, with patches of yellow and a dull red mostly covered with thin light russet; very juicy, melting, sweet and vinous; a fine grower and good bearer. Oct. to Nov.

BEURRE BOSC PEARS SHOULD BE IN EVERY HOME GARDEN

BEURRE BOSC admitted to be the richest, sweetest pear known. Large; yellow russet, melting, high flavored and excellent. Should be planted more extensively on account of its high quality. In great demand at fancy fruit stores, often selling as high as 20 cents each. Oct. to Nov.

Propagated Where the Best Trees Grow

CLAPP'S FAVORITE. HIGH QUALITY, PROFIT MAKING PEAR

CLAPP'S FAVORITE—Large size; pale lemon yellow; flesh fine grained, juicy, melting, rich and buttery, earlier than Bartlett and resembling the Flemish Beauty in growth. A good grower and productive.

Worden-Seckel—This beautiful and delicious pear attracted wide attention when introduced recently. In quality it is rated very high. In size it is much larger than Seckel.

Lawrence—Trees healthy, hardy and very productive. Fruit large; skin yellow, covered with brown spots. Flesh whitish, rich, buttery, and aromatic. One of the quality pears that has great merit for commercial orchards.

ANJOU—For late fall and early winter use. there is no better variety. Quality equal to Bartlett. A close second to Bartlett in public favor. Distributes its fruit well, and stands up under a load better than Bartlett. Equal in quality to Bartlett and holds up longer.

Howell—Large size; light-waxen yellow, sweet and melting; excellent quality; a strong and hardy grower and good bearer. Sept. to Oct.

LEADING VARIETIES OF FRUIT TREES—For the convenience of our customers who may not be entirely familiar with the best and most profitable varieties, we have given full description of such sorts, in black face type. In making your selection, it will pay you to choose from among those varieties.

Wilder—Handsome, melting, sweet, pleasant, with small core, fine grained, tender and juicy. Greenish yellow with brownish red cheeks. August.

Beurre Clairgeau—Very large; light yellow, shaded with crimson and russet; an early and abundant bearer. January.

ANJOU WINTER PEAR—DELICIOUS FLAVOR

Bargain Size Trees

MANY PLANTERS PREFER TO PLANT THE SMALLER SIZE TREES AS IT REDUCES THE COST OF INVESTMENT. In all cases they report success in planting this grade as the fibers of the roots are small and readily adhere to the ground and make a rapid and very satisfactory growth the first year. A few buyers of fruit trees have an idea that the smaller size trees are poor trees and are not fit to plant. It is a mistaken idea.

All Bargain Size Trees are Strictly First Class of the Grade Offered, Well Rooted and Branched, Fresh Dug, and Guaranteed True to Name. 6% discount for cash with order.

Propagated Where the Best Trees Grow

Pomona's Select Varieties of Quince

ORANGE QUINCE, THE BEST FOR JELLIES AND PRESERVES

THE QUINCE is of late attracting a great deal of attention as a market fruit. Scarcely any fruit will pay better in the orchard. The tree is hardy and compact in growth, requiring but little space, productive, gives regular crops and comes early into bearing. The fruit is much sought after for canning for winter use. When put up in the proportion of about one quart of Quinces to four quarts of other fruit, it imparts a delicious flavor.

REA'S MAMMOTH

Rea's Mammoth. A seedling of the Orange; larger than that variety but of same form and color. Excellent flavor and very productive. It flourishes in any good garden soil, which should be kept mellow and well enriched. Prune off all the dead and surplus branches.

Champion. Fruit very large, fair and handsome. Tree very handsome, surpassing other varieties in this respect; bears abundantly while young; flesh cooks as tender as an apple and without hard spots or cores; flavor delicate, imparting an exquisite quince taste and odor to any fruit with which it is cooked. The most valuable of all.

Orange. Large, roundish; bright golden yellow; cooks tender and is of very excellent flavor. Valuable for preserves or flavoring; very productive; the most popular and extensively cultivated of the old varieties. October.

Missouri Mammoth. Large size, very productive; superb market sort.

Meech's Prolific. The most prolific of all known varieties; ripens between the Orange and the Champion. Bears very early, usually a full crop at three years; quality unsurpassed and size large.

Bourgeat. A new golden prolific variety of the best quality. Tree a remarkably strong grower, surpassing all others, yielding immense crops, fruiting at three and four years in nursery rows. Fruit of largest size, round, rich golden color; smooth, very tender when cooked; has been kept until February in good condition.

CHAMPION QUINCE

POMONA'S LOW PRICE FOR ALL VARIETIES OF QUINCE TREES

Dwarf Fruit Trees are the Solution for Small Backyards

THE DWARF PEAR TREE TRAINED IN A NOVEL WAY, SUITABLE FOR USE AGAINST A GARAGE OR AS A SCREEN

Select Varieties of Dwarf Pears

DWARF Pear Trees often bear the same year planted, and the trees occupy but little room in the garden. They can be planted very closely together and kept headed back. There is scarcely a city or town lot so small that room cannot be found for a few dwarf fruit trees. Their hardiness makes it possible for anybody, anywhere, to produce delicious fruits.

We offer the following list of superior varieties that will succeed as Dwarf trees. (See description of these on other pages.)

Bartlett, Seckel, Clapp's Favorite, Duchess, Anjou, Kieffer, Flemish Beauty and Wilder Early.

Pomona's Price for Dwarf Pear

Extra Size Trees, 2 yr., 4 to 5 ft., XXX 65c each; 10 for \$6.00; 100 for \$50.00

Orchard Size Trees, 2 yr., 3 to 4 ft., XX 55c each; 10 for \$5.00; 100 for \$40.00.

Mailing Size, 2½ to 3 ft., 50c each.

Select Varieties of Dwarf Apples

LIKE Dwarf Pear Trees they come into bearing much earlier than Standard Trees. Their low broad heads are within reach, so that apples or pears can be easily picked. You can plant your garden full of dwarf fruit trees and still grow strawberries and vegetables. With dwarfs some varieties will bear the second year, and will bear a full crop the fourth year.

We can supply the following varieties: Yellow Transparent, Gravenstein, Baldwin, McIntosh, Alexander, Duchess, Grimes' Golden, Yellow Belleflower, Twenty Ounce, Delicious, Wagener, Jonathan, Wealthy, Opalescent, Red Astrachan.

Pomona's Price for Dwarf Apple

Extra Size Trees, 2 yr., 4 to 5 ft., XXX, \$1.00 each; 10 for \$9.50.

No. 2418

CERTIFICATE

STATE OF NEW YORK

Certificate of Inspection of Nursery Stock

Department of Farms and Markets

This is to certify that the stock of Pomona United Nurseries, of Dansville, County of Livingston, State of New York, was duly examined in compliance with the provisions of article 14 of the Farms and Markets law, and was found to be apparently free from any contagious or infectious disease or diseases, or the San Jose scale, or other dangerously injurious insect pest or pests. This certificate expires Sept. 1, 1926.

Dated Albany, N. Y., Sept. 8th, 1925.

BERNE A. PYRKE, Commissioner.

BY GEO. G. ATWOOD, Director Bureau of Plant Industry.

Propagated Where the Best Trees Grow

Select Varieties of Apricots

A very delicious fruit of the plum species. These Russian apricots are quite distinct from the European varieties, which I have discarded, all but a very few of the best European varieties. This variety can be grown wherever peaches can be grown. The other varieties can be grown successfully in any country where the plum succeeds. They are the most beautiful and delicious of all fruits, commanding at all times a good price in our markets, both fresh and dried. We believe no garden should be without a few of these trees. They bear very young and abundantly. They will stand thirty degrees below zero without injury, and are perfectly free from insect ravages and disease.

The leading characteristics of the apricot are extreme hardiness, early bearing, productiveness, and freedom from disease. Every garden should have one or more trees. In the selection of choice garden fruits it is quite indispensable. It succeeds well trained against a house wall, fence or trellis, leaving the open ground for other trees. In cold sections, too, where the trees get winter killed, or the blossoms injured by the late spring frosts, trees can easily be protected by mat or board screens.

Alexis—Very hardy; an abundant bearer; yellow, with red cheek; large to very large; slightly acid, rich and luscious. July.

ALEXANDER APRICOT

ALEXIS APRICOTS

Gibb—Tree hardy, grows symmetrical, productive; fruit medium, yellowish, sub-acid, juicy and rich; the best early variety, ripening soon after strawberries. Last of June.

J. L. Budd—Tree a strong grower and profuse bearer, fruit large, white with red cheek; sweet, juicy, with a sweet kernel, as fine flavored as an almond; the best late variety.

Moorpark—Large size, surface orange-red, with a deep orange-red cheek, with a rich, high flavor.

Montgamet—Deep yellow, one of the best for preserving. Sub-acid and of good quality. Tree vigorous and productive.

Alexander—Very hardy, an immense bearer; fruit large, yellow, flecked with red; very beautiful, sweet and delicious. July.

POMONA'S LOW PRICE FOR ALL VARIETIES OF APRICOTS

Extra Size	XXX	5 to 6 Ft.	75¢ each	10 for \$7.00
Medium Size	XX	4 to 5 Ft.	70¢ each	10 for \$6.50
Orchard Size	X	3 to 4 Ft.	50¢ each	10 for \$4.50

POMONA TREES BEST TO PLANT

OUR DANSVILLE GROWN TREES are the best, because the planter receives them fresh dug, true to name. Personal attention is given every order. You run no risk of receiving poorly kept storage trees and plants. We take pains to see that our patrons are well served, and they get good results. It is to our advantage to satisfy you and we will, if favored with your order.

Select Varieties of Nut Trees

THE growing demand for nuts, and the immense quantities of them yearly imported to meet it have given a great impetus to the planting of nut-bearing trees. The returns from established nut-bearing orchards, as well as numerous experiments, show plainly how successful nut culture may be made in many sections.

Black Walnut—A native tree of large size and majestic form, beautiful foliage. The most valuable of all trees for its timber, which enters largely into the manufacture of fine furniture and cabinet ware, and brings the highest price in market. Tree a rapid grower, producing a large round nut of excellent quality.

Price of Black Walnut Trees, 3 to 4 Feet, \$1.00 each; 4 to 6 Feet, \$1.50 each.

The American Sweet Chestnut—Is adapted to a great portion of this country. It is valuable as a nut producing tree, timber and ornamental purposes. As high as \$14.00 per bushel has been paid for American Sweet Chestnuts when first brought into New York market. \$6.00 to \$10.00 per bushel is the common price.

Price of American Sweet Chestnut Trees, 3 to 4 Feet, \$1.00 each; 4 to 5 Feet, \$1.50 each.

Walnut, English. A fine, lofty, growing tree, with handsome, spreading head; produces large crops of thin-shelled, delicious nuts which are always in demand at good prices. Every home garden should have one or more English Walnuts. Tree very hardy.

2 to 3 Feet, \$1.50 each; **3 to 4 Feet**, \$1.75 each.

ENGLISH WALNUTS

JAPAN WALNUT (Siebold)—This is a very hardy variety, will stand 20 degrees below zero without injury, a rapid-growing, handsome

PECAN NUTS

tree which bears young and abundantly. The shell is but a little thicker than that of the English walnut, the meat of which comes out whole and is of excellent quality. This variety begins to bear when two or three years old.

Prices of Japan Walnut Trees, 3 to 4 Feet, \$1.00 each; 4 to 6 Feet, \$1.25 each.

Pecans—Are harder than English Walnuts, but will not succeed far north. This nut is very productive.

Price of Pecan Nut Trees, 3 to 4 Feet, \$1.50 each.

Hickory, Shell Bark—To our taste no other nut that grows, either foreign or native, is superior to this in quality; it possesses a peculiar, rich nutty flavor excelled by none. The tree is of sturdy, lofty growth. The wood, on account of its great strength and elasticity, is highly prized for making agricultural implements.

Price of Hickory Nut Trees, 3 to 4 Feet, \$2.50 each.

Butternut—A fine native tree producing a large longish nut, which is prized for its sweet, oily, nutritious kernel.

Price of Butternut Trees, 5 to 6 Feet, \$1.50 each.

Propagated Where the Best Trees Grow

Select Varieties of Currants

WILDER, THE MOST PRODUCTIVE RED CURRANT

THE CURRANT is one of the most productive and best paying small fruit that we have. There is, we believe, more profit to the acre in currants than in any other small fruit.

WILDER. (Red)—Very large; deep red; bunches long. Plants erect, stout, vigorous and productive.

Fay's Prolific. (Red)—A cross between Cherry

and Victoria. Of large size, fine flavor, and claimed to be twice as prolific as the Cherry.

RED CROSS. A strong growing variety. Cluster long; berry medium to large, bright red; quality good to best. Very productive.

Wholesale Price for all varieties of Currants, 2 year bushes, 30 cents each, 10 for \$2.50, 100 for \$15.00, 500 for \$60.00, 1000 for \$100.00.

Select Varieties of Gooseberries

Plant in good rich soil and give a liberal dressing of manure every season. Regular pruning every year is essential for the production of fine fruit.

DOWNING. Large, handsome pale green, and of splendid quality for both cooking and table use; bush a vigorous grower.
2 Year Bushes 45c each, 10 for \$4.00.

HOUGHTON—Small to medium; roundish, oval, pale, sweet, tender, very good; plants spreading; shoots slender.
2 Year Bushes 45c each, 10 for \$4.00.

Columbus. Fruit of largest size, oval, handsome, a greenish yellow, finest quality. Plant a strong robust grower, free from mildew.
2 Year Bushes 45c each, 10 for \$4.00.

Red Jacket. A new red berry of large size and good quality; hardy and very productive.
2 Year Bushes, 50c each; 10 for \$4.50.

Due to a Federal Quarantine, we can ship Currant and Gooseberry Bushes to the following states only: Connecticut, Illinois, Indiana, Massachusetts, Michigan, New Jersey, Ohio, New York and Pennsylvania.

Josselyn. Large size, smooth, prolific and hardy, of best quality. Has been tested over a wide extent of territory by the side of all the leading varieties, and so far is the freest from mildew.

2 Year Bushes, 50c each; 10 for \$4.50.

Pomona United Nurseries, Dansville, N. Y.

Tulsa, Okla., Feb. 18, 1925.

Gentlemen: I have bought trees from you before which were of the finest quality and true to name.

Having some of my friends that want trees, am writing for catalogues.

Very truly yours,

R. W. Schreckengort.

Pomona's Select Varieties of Grapes at Low Prices

Grapes are planted anywhere and everywhere—to trail over the sides of houses, on arbors, sheltering paths, fences, etc.; even people who live in the crowded parts of cities may have them.

CONCORD, THE LEADING COMMERCIAL GRAPE

CONCORD—Bunch large, shouldered, compact; berries large, covered with a rich bloom. Vine a strong grower, very hardy. The best for making grape juice and wine.

SPECIAL LOW PRICE ON CONCORD GRAPE VINES

Two Year Vines 25¢ each, 10 for \$2.00, 100 for \$15.00, 1000 for \$120.00

Propagated Where the Best Trees Grow

Pomona's Varieties of Grapes at Low Prices

THE GRAPE is one of our most delicious fruits. Contrary to common opinion it does not demand a special or particular kind of trellis. We have seen vines bear by the bushel growing on a garden or yard fence. Hardy, thrifty, free of disease, the grape is our standby.

Agawam (Roger's No. 15)—Berries very large, thick skin, pulp soft, sweet, sprightly, very vigorous, ripens early.

Diamond—Leading early white grape, ripening before Moore's Early.

Pocklington—One of the largest and most showy white grapes of the Concord type.

Catawba—Berries large, round; when fully ripe of a dark copper color.

Lindley (Roger's No. 9)—Berries medium to large; flesh tender, sweet and aromatic.

Salem (Roger's No. 53)—Bunch large, compact; berry large, round, coppery red, tender, juicy. Ripens with Concord.

Collection of Grape Vines

10 Strong 2 Year Vines for \$1.95

3 Concord

3 Niagara

2 Salem (Red)

All Strong 2 Year Vines for \$1.95

Every garden has room for a few
Grape Vines

NIAGARA WHITE—Occupies the same position among the white varieties as Concord among the black; the leading profitable market sort. Bunch and berries large, greenish white changing to pale yellow when fully ripe.

Campbell's Early (Black)—Strong grower, with large, healthy foliage; productive, its keeping and shipping qualities are equaled by no other early grape.

Diamond White—The leading early white grape, ripening before Moore's Early. White, with rich yellow tinge; juicy, few seeds, almost free from pulp, excellent quality.

Chas. A. Green White—Claimed by the introducer to be a new and valuable variety, a vigorous grower and an enormous yielder of very large and beautiful clusters of excellent fruit.

McPike—This mammoth black grape has been exhibited in all parts of the country, its great size, fine flavor and beauty creating quite a sensation. The bunches are large, even and compact.

MOORE'S EARLY (Black)—Bunch and berry large, round with heavy bloom; vine exceedingly hardy. Its earliness makes it desirable for an early market.

Brighton—Perhaps the best red grape in cultivation. Bunch large, compact; strong grower and very productive; quality good.

Bainbridge, Ga., May 11, 1925.

Pomona United Nurseries:

I received the Grape Vines in fine condition. Accept my thanks. They are growing nicely. Some of them have made a growth of 24 inches. Am well pleased with our business transactions.

D. C. BYLES.

MOORE'S EARLY BLACK GRAPE

POMONA PRICE FOR ALL VARIETIES OF GRAPES ON THIS PAGE

Strong 2 year vines, 25 cents each, 10 for \$2.25, 100 for \$20.00

1 Year No. 1 Vines 20 cents each, 10 for \$1.75, 100 for \$15.00

RASPBERRIES

WILL do well on any soil that will produce a good corn crop. Land should be thoroughly prepared and well enriched; ground bone is one of the best fertilizers. Keep well cultivated and free from weeds and suckers. As soon as they have done bearing, cut out the old wood to give more vigor to the young canes. Plant in rows five feet apart, three feet apart in rows.

Red Varieties

St. Regis Everbearing. A wonderful new variety of Red Raspberry, bears fruit the first season, bears for four months, beginning about June fifteenth. The second crop of berries is borne on the ends of the new canes and ripens about the middle of August and continues until frost.

CUTHBERT. Large, conical; deep rich crimson; firm, of excellent quality. Vigorous grower, entirely hardy and immensely productive. The best raspberry for general culture.

Marlboro. The best early red raspberry. Hardy and productive.

LOUDON. Ripens with the earliest and hangs to the last. Immensely productive and a fine shipper. Very hardy and does not sucker nearly so much as other red raspberries.

Binghamton, N. Y.

The nursery stock you shipped me is sturdy and healthy looking.

The berry bushes are fine with well developed roots, much better than some I got from Rochester for which great claims were made, and for which I paid 55c apiece. Fortunately, however, I only got stung for a dozen.

Yours truly,

BURTON D. SAINT.

CUTHBERT RASPBERRY

KANSAS BLACK RASPBERRY

Black Varieties

KANSAS. Largest size, strong, vigorous grower, hardy, bearing immense crops. Size of Gregg.

Black Diamond. One of the best for home and market use. For drying and evaporating it excels all others. The fruit is large and handsome.

Cumberland. Plants vigorous, hardy and productive; fruit large. Mid-season.

Gregg. Plants vigorous, hardy and productive; fruit above medium to very large.

PLUM FARMER. Berry large and very productive, a great favorite in Western New York. A fine picker and one of the best market sorts.

Ohio. A very strong growing hardy sort; fruit nearly as large as Mammoth Cluster; more productive.

Purple Varieties

COLUMBIAN. Very large, often an inch in diameter; adheres firmly to stem and will dry on the bush if not picked. Very large, dark reddish purple, rich, juicy and delicious.

Pomona low Price for all varieties of Raspberries, Strong No. 1 Plants. By Express 10 for \$1.00, 25 for \$1.50, 100 for \$4.50, 1000 for \$30.00. By Mail (Postpaid) 10 for \$1.10, 25 for \$1.75, 100 for \$5.00.

Propagated Where the Best Trees Grow

Select Varieties of Blackberries

THIS profitable fruit should be planted for garden use in rows five feet apart, with plants three feet apart in rows; for market, in rows six feet apart, with plants three feet apart in the rows. Give the plants the same cultivation as for raspberries.

ELDORADO. The best all-round berry yet produced, combining nearly all the good qualities found in a blackberry. The vines are very hardy and vigorous, enduring the winters of the far Northwest without injury, and their yield is enormous. The berries are large, jet black, borne in large clusters and ripen well together; they are very sweet, melting, have no hard core and keep for eight or ten days after picking.

SNYDER. Extremely hardy; enormously productive; medium size.

Wilson's Early. Large size, black, quite firm, rich, sweet and gold. Ripens early and matures its fruit rapidly; retains its color well after picking.

Minnewaska. Wonderful, hardy, productive, good blackberry, has not been forgotten by us, or our old patrons. Its principal points are hardiness, excellent quality, earliness, and continued bearing and productiveness.

Early Harvest. The earliest blackberry and valuable for market. The canes are strong and upright in growth and enormously productive. Berries sweet and of the highest quality.

Erie. Bush vigorous; berry large, round; good quality; early and productive.

RATHBUN. Bush perfectly healthy, vigorous, but not a high growing sort; very rarely suckers from the roots. Fruit of largest size, highest quality.

Agawam. Ripens earlier than other kinds, and has a flavor similar and equal to the wild berry. Very hardy.

Ancient Briton. Bush hardy and very productive. One of the best old sorts, and still grown in immense quantities by successful market gardeners.

Blower. Large size, jet black, good shipper, best quality, unexcelled productiveness are the main characteristics of this splendid new sort.

Wolcott, N. Y., Feb. 13.

Wells, are you still alive and doing business? If so, I would like to hear from you.

You will remember selling me in 1914 sufficient apple trees to set an orchard of ten acres. Well, these trees came. I set them and they have proved satisfactory.

My Greenings have been bearing for the past four years. I am in need of several hundred more trees this spring.

Will you please quote me and offer any suggestions that you see fit.

Very truly yours,
D. W. Wadsworth.

Pomona low Price for all varieties of Blackberries, Strong No. 1 Plants. By Express 10 for \$1.25, 25 for \$1.75, 100 for \$6.50, 1000 for \$45.00. By Mail (Postpaid) 10 for \$1.35, 25 for \$1.95, 100 for \$7.35.

Select Varieties of Strawberries

CORSICAN, (REDUCED), THE FINEST HOME GARDEN BERRY

NOTE:—Do not order strawberry plants sent by freight. Our patrons order from 50 to 500 trees, and 500 or more strawberry plants by freight. Now the trees should go by freight and the strawberries by express, or small lots by mail. In all cases when desired by mail, add postage at rate of 20c per 100. Always state plainly that the strawberry plants are to be sent by express or mail.

SENATOR DUNLAP. A well tested, early variety, one of the safe sorts to plant everywhere. Fruit good size, regular form, beautiful bright red, glossy, firm, splendid keeper and shipper, excellent quality, one of the best for canning.

BRANDYWINE. A very late and firm berry; a good shipper, good canner, a good all around strawberry. Season medium late.

CORSICAN. Is a great strawberry for many reasons. First, it is the biggest berry; second, it is the brightest and best in color; third, it is a great yielder, and producer; fourth, and the most important of all, the foliage is exceedingly vigorous and leathery.

Sample. Late, of large size and yields enormous quantities of high quality bright red berries. A standard shipping variety.

Pomona Wholesale Price for all varieties of Strawberries, (except Fall Bearing,) (by express) 25 for \$1.00, 100 for \$1.95, 1,000 for \$12.50. By mail postpaid, 25 for \$1.15, 100 for \$2.25.

Fall or Everbearing Varieties

Americus. Plant medium sized, foliage medium; fruit light red, heart shaped, of fine texture, has a good heavy root system, a fairly good plant maker, blossoms strongly staminate, good quality.

SUPERB. The plants of Superb are of good, average size, are strong growers and stand the winters best of all kinds tested. The fruit is very large, roundish, dark-colored, glossy, attractive and smooth.

Pomona Price for all Fall Bearing varieties (by Express) 10 for \$1.50, 25 for \$2.50, 100 for \$5.50. By mail postpaid, 10 for \$1.50, 25 for \$2.60, 100 for \$6.25.

Propagated Where the Best Trees Grow

Garden Roots—Asparagus and Rhubarb

ASPARAGUS USED FOR DECORATION DURING SUMMER

POMONA'S PRICE FOR ALL VARIETIES OF ASPARAGUS NAMED ABOVE

Strong 2 Year Roots 25 for \$1.00, 100 for \$2.00, 1000 for \$12.50

Rhubarb (Pieplant)

The first thing in the spring to furnish material for pie and sauce. Its health-giving, tonic properties make it invaluable as a spring regulator. Easy to grow. Should be in every home garden. Plant in rows 4 feet apart with roots 3 feet apart in row.

Myatt's Linnaeus—The best variety for general use. Stems large, tender and of refined flavor. Yields abundantly. Prices of strong two-year roots, 20 cents each; 10 for \$1.75; 100 for \$12.00; 1,000 for \$95.00.

Horse Radish

English or Common—The variety in general use. Will stand a great deal of hardship and persist in soil year after year. Does best in deep, rich, cool soil. As high as ten tons have been received from an acre. Plant in rows 3 feet apart and 1 foot apart in row.

Price Strong Sets: 10 for \$1.00; 100 for \$6.00.

Cultivation—See that the ground is well drained, naturally or otherwise, work it up fine and deep and make it very rich with well rotted barnyard manure. Locate the plants eight inches apart in rows three feet apart. Spread out the roots in a trench made deep enough to permit their crowns to be covered with three or four inches of mellow earth. Give the bed liberal dressings of manure at intervals, and except near the sea-shore, three pounds of salt per square yard early every spring. Do not cut for use until the plants have grown two seasons.

Palmetto—Until recently we believed that Conover's Colossal was the best sort known, but we are now forced to concede that the Palmetto is earlier and a better yielder, and more even and better in growth, and that it will eventually supersede the old favorite. The average bunches contain 155 shoots, measuring thirteen and one-half inches in circumference, weighing nearly two pounds. It has been tested both north and south, and has proved entirely successful in every instance.

Barr's Mammoth—This is one of the finest varieties of asparagus ever offered, being large and early. Stalks are large, tender, and of light color.

Conover's Colossal—This variety is superior in size and quality, remarkably tender and fine flavored. Valuable for market and home use.

ASPARAGUS TIED READY FOR MARKET

Plainfield, N. J., May 7, 1925.

POMONA UNITED NURSERIES:

My order received in good condition and I wish to state I am more than pleased with same. The special bargain size stock is very good and far better than I expected for the price paid. It can't be beat.

Thanking you for prompt attention and first class stock you have shipped.

H. W. HODGSON.

WINNERS OF PRIZE CONTEST WHO WROTE

Pomona Trees Fruit True to Name

the largest number of times in last Spring's contest were as follows:

1st Prize, Harvard Fout, Marion, Ohio.....	1337 Lines
2nd Prize, I. G. Henseler, Marshfield, Wis.....	503 Lines
3rd Prize, Mrs. A. C. Barker, Lewiston, Me.....	423 Lines

Ornamental Trees

Showing
What
Can Be
Done
With
American
Elms In
20 Years.

Plant The
Roadway
In Front
Of The
Farm To
Look
Like This

THE AMERICAN ELM THAT MADE THE
FARM FAMOUS

A LITTLE over twenty years ago, the site of this picture was farm land. When laying it out for a "future" city street the owner had the wisdom and forethought to plant the double row of elm trees on either side of the roadway, which, in a few years, enhanced the value of the property many times its original worth.

Note the light and airy appearance of the grounds surrounding these trees, while there is beautiful foliage at the top.

Plant the roadway in front of your home to look like this. The city man is seeking the country for a home. It is the beautiful places, the highways planted with trees that attract his attention.

ELM, AMERICAN—A graceful drooping branched tree. A great favorite with the American people.

Price of American Elm Trees

6 to 8 ft. trees, \$1.25 each, 10 for \$12.00.
8 to 10 ft. trees, \$1.85 each, 10 for \$17.50.
10 to 12 ft. trees, \$2.50 each, 10 for \$22.50.

Ash, (American). Smooth, gray bark with glossy leaves, not subjected to the attacks by insects.

Price, 5 to 6 ft., 90c each; 6 to 8 ft., \$1.25 each.

ORNAMENTAL TREES

BARBERRY THUNBERGII

CATALPA BUNGEII EACH SIDE OF STEPS

Catalpa Bungeii (Umbrella Catalpa). Grafted on stems six to eight feet high, it makes an umbrella-shaped top without pruning. Perfectly hardy, and flourishes in almost all soils and climates. Leaves large, glossy, heart-shaped, deep green; lay like shingles on a roof; always making a symmetrical head. One of the most unique trees, a valuable acquisition, desirable for lawn, park and cemetery planting. Can also be supplied worked low, making an exceedingly handsome dwarf specimen.

Price for Catalpa Bungeii 2 Year Heads

4 to 5 ft. trees, \$1.35 each, 10 for \$12.50.

5 to 6 ft. trees, \$1.75 each, 10 for \$15.00.

6 to 8 ft. trees, \$2.50 each, 10 for \$22.50

Mulberry, Downing. Yields an abundance of large, refreshing berries for about three months. Suitable for lawn planting.

Price, 5 to 6 ft. \$1.25 each.

Mulberry, Russian. A very hardy rapid growing tree. Fruit a medium size and a great bearer. Largely planted in the west for timber. Price, 5 to 6 ft., \$1.00 each; 6 to 8 ft., \$1.35 each.

Alder, (European). Remarkable fast growing tree, with wedge-shaped foliage.

Price, 5 to 6 ft., 90c each; 6 to 8 ft., \$1.25 each.

CATALPA BUNGEII

It is well recognized that shade trees around the farm and city home not only add to its beauty and comfort, but greatly increase the value of the property. Truly "It's not a home until it's planted."

LOMBARDY POPLAR, FINE FOR PLANTING ALONG DRIVEWAYS. OFTENTIMES USED FOR SCREEN HEDGES. SNOWBALL HYDRANGEA IN FRONT OF TREES

Birch, (European White).—Beautiful white bark, spray like branches.
Price, 4 to 6 ft., \$1.25 each; 6 to 8 ft., \$2.00 each. 8 to 10 ft., \$2.50 each.

BECHTEL'S DOUBLE FLOWERING CRAB AND BED OF YELLOW IRIS

Crab, Bechtel's Flg.—Especially adapted for massing. Pink rose-like flowers. A very attractive flowering shrub. Price, 2 to 3 ft., \$1.35 each; 3 to 4 ft., \$1.75 each.

Lombardy Poplar—This is an old favorite. Well known and remarkable for its erect rapid growth, and tall, spiral form. Indispensable in landscape gardening, to break the ordinary and monotonous outlines of most other trees.

Price	Each	Per 10	Per 100
5-6 ft.	\$.45	\$4.00	\$35.00
6-8 ft.	.70	6.50	60.00
8-10 ft.	1.00	9.00	85.00

Poplar, Carolina—A remarkably rapid, luxuriant grower. Very large leaves, very glossy, deep green. Has the advantage over other shade trees in that it will grow in any kind of soil and will thrive in places where others will fail to live. For a quick-growing shade tree there is none that equals the Carolina Poplar. Also useful for planting as a screen to hide unsightly buildings or as a windbreak for orchard or garden plot.

Price	Each	Per 10	Per 100
5-6 ft.	\$.40	\$3.50	\$27.50
6-8 ft.	.65	6.00	55.00
8-10 ft.,	.75	7.00	65.00

Catalpa Speciosa—Fragrant white flowers in July. Open irregular growth, large heart shaped leaves.

Price, 6 to 8 ft., \$1.00 each; 8 to 10 ft., \$1.50 each.

Mulberry, Tea's Weeping. A weeping variety of the now well known Russian Mulberry. Perfectly hardy, withstands the coldest winters. Price, 2 yr. heads, \$3.50 each.

Ailanthus, (Tree of Heaven). Unexcelled for city planting. Tropical foliage. Price, 6 to 8 ft., \$1.75 each.

Ornamental Trees

A Beautiful Country Road

It is a pleasure to be on a restful country road such as is shown here, with its feeling of prosperity, thrift, and an atmosphere of real living.

A COUNTRY HIGHWAY PLANTED WITH SILVER MAPLE TREES. NOTE THE DIGNITY THAT THIS HANDSOME ROW OF MAPLES LENDS TO THE ADJOINING FARMS.

Maple, Silver Leaf. A rapid growing maple of spreading habits, excellent for sandy soil. Foliage silvery on under side.

Price, 4 to 6 ft., 60c each; 10 for \$5.50; 6 to 8 ft., \$1.25 each; 10 for \$10.00; 8 to 10 ft., \$1.75 each; 10 for \$15.00; 10 to 12 ft., \$2.25 each; 10 for \$20.00.

Maple, Ash Leaf. Fast growing, has spreading habit. Leaves light green.

Price, 5 to 6 ft., 75c each; 10 for \$7.00; 6 to 8 ft., \$1.25 each; 10 for \$12.00; 8 to 10 ft., \$1.75 each.

Maple, Japan Blood-leaf. Bright red foliage with delicate cut leaf.

Price, 12 to 15 in., \$6.00 each.

Maple, Norway. Round headed tree with dark green foliage. Largely used for street and shade.

Price, 6 to 8 ft., \$3.50 each; 10 for \$30.00; 8 to 10 ft., \$5.00 each; 10 for \$45.00; 10 to 12 ft., \$5.50 each.

Maple, Scarlet or Red. Handsome, with color changing foliage crimson to green, red and brown.

Price, 6 to 8 ft., \$2.50 each; 10 for \$24.50.

Camperdown Weeping Elm—A vigorous grower and forms one of the most picturesque drooping trees. Leaves large, dark green and glossy and cover the tree with a luxurious mass of verdure; very desirable.

Price of Camperdown Weeping Elm, \$3.50 each.

Maple, Sugar, Hard. Straight and spreading, dark green leaves turning to scarlet in the autumn.

Price, 6 to 8 ft., \$3.00 each; 8 to 10 ft., \$4.00 each.

Maple, Sycamore. Horizontal and spreading, with round head. Bark is smooth. Leaves are large.

Price, 6 to 8 ft., \$3.50 each; 8 to 10 ft., \$4.50 each.

Maple, Weir's Cut-leaf. A drooping tree with finely cut foliage. One of the finest lawn trees.

Price, 5 to 6 ft., \$1.25; 10 for \$10.00. 6 to 8 ft., \$1.75 each; 10 for \$15.00.

CAMPERDOWN WEeping ELM

Ornamental Trees

HARDY TREE HYDRANGEA

Hardy Tree Hydrangea

It forms a graceful and dwarfish tree, not reaching more than eight to ten feet in height, and is extremely effective for lawn decoration, whether standing singly or in masses. The immense trusses of bloom appear at just the time when other flowers are scarce, and last from the first of August until frost comes. It is entirely hardy and very easy to grow.

Price Tree Hydrangea, 3-4 ft., \$1.50 each; 2-3 ft., \$1.25 each.

Linden, American, (Bass Wood)

—Fragrant yellow flowers in July. Leaves are large, smooth and showy.

Price, 6 to 8 ft., \$2.00 each.

Cut-Leaved Weeping Birch—

The most popular of the weeping trees. Its tall, slender, yet vigorous growth, graceful branches, silvery white bark, and delicately cut foliage, present a combination of attractive characteristics rarely met with in a single tree.

Price, 3 to 4 ft. trees, \$2.75 each. **Price**, 4 to 5 ft. trees, \$4.00 each. **Price**, 5 to 6 ft. trees, \$5.00 each.

Mountain Ash, American—

White flowers in June, followed by very attractive scarlet berries that hang until late in fall.

Price, 6 to 8 ft., \$2.00.

Horse Chestnut (White Flowering)—Has white flowers in May. Very hardy, succeeding everywhere planted.

Price, 4 to 5 ft., \$3.00 each; 5 to 6 ft., \$4.50 each.

Oak, Pin—Tree of pyramidal shape with beautiful crimson leaves in fall.

Price, 5 to 6 ft., \$2.50 each.

Oak, Scarlet—Valuable for its brilliant fall coloring.

Price, 6 to 8 ft., \$3.00 each.

Peach, Double Red and Double White Flowering

—Has beautiful double flowers in May.

Price, 2 to 3 ft., \$1.00 each; 3 to 4 ft., \$1.35 each.

Mention color wanted when ordering.

Prunus Triloba, Double Flowering Plum—A highly interesting and desirable addition to hardy shrubs. Flowers double delicate pink.

Price, 3 to 4 ft. trees, \$1.25 each.

Oak, American—Tree has spreading branches with a broad open head.

Price, 6 to 8 ft., \$2.50 each.

Prunus Pissardi, Purple-Leaf Plum—

The finest purple leaf, small tree or shrub.

Price, 4 to 5 ft., \$1.25 each; 10 for \$12.00.

Laburnum, (Golden Chain)—Has long pea-shaped, yellow flowers in June, resembling wisteria. A very attractive tree with dark green foliage.

Price, 4 to 5 ft., \$1.50 each.

Salisbury Maiden's Hair—Pyramidal tree with fan-shaped leaves. Very attractive.

Price, 5 to 6 ft., \$2.00 each.

Willow, Kilmarnock—Branches spreading and drooping, forming an umbrella-like head.

Price, 1 yr. heads, \$3.50 each.

**MOUNTAIN ASH
(AMERICAN)**

**WHITE FLOWERING
HORSECHESTNUT**

Hardy Climbing Vines

CLEMATIS JACKMANNI

Dutchman's Pipe (Aristolochia). A native species of climbing habit and rapid growth, with magnificent light green foliage, 10 to 12 inches in diameter and curious pipe-shaped, yellowish-brown flowers. Price, 2 year old, \$1.00 each; 10 for \$9.00.

Ivy, American or Virginia Creeper. A fine rich green in summer, changing to crimson in autumn. Affords shade quickly and is very desirable for covering walls, verandas or trunks of trees. Price, 50c each.

Honeysuckle, Hall's Japan. A strong, vigorous, almost evergreen sort, with pure white flowers, changing to yellow. Very fragrant. Covered with flowers from July to December; holds its leaves until January. Price, 50c each; 10 for \$4.50.

Trumpet Vine (Bignonia). Flowers large, trumpet-shaped, orange red in Summer. Recommended for arbors, rocks, brightening of hedges or over old trees or logs. A strong, high grower. Price, 60c each.

CLEMATIS. This is one of the most attractive and effective of the hardy flowering climbing vines. Especially adaptable for covering trellises, fences, walls and pillars, also suitable as a bedding plant, covering a bed quickly if fastened down occasionally.

Clematis Paniculata. Single, white. Of extremely rapid growth, with shining green foliage, and a profusion of flowers which are small, but borne in large panicles; very popular. Price, 50c each.

Clematis Jackmanni. Large, intense violet purple and remarkable for its velvety richness; free in growth; abundant and successive bloomer. Price, 95c each.

Clematis Henryii. Single; the finest white Clematis; very large, fine flowers; grows rapidly, blooms freely during summer and autumn. Price, 95c each.

Clematis, Mme. Ed. Andre. Flowers medium size; dark red; flowering. Price, 95c each.

Wistaria, Purple. A beautiful climber of very rapid growth, producing long, pendulous clusters of pale, blue flowers in June, also in Fall; is perfectly hardy and one of the most superb climbing vines ever introduced. Price, 85c each.

Wistaria, White. An attractive and strong grower with a large number of hanging pea-shaped, white flowers. Price, 85c each.

Boston Ivy (Japan.) A tight climber; among the best as a basket or vase plant. Leaves attain a brilliant crimson in Autumn. Hardy. Japanese in origin. Price, 75c each.

CLEMATIS PANICULATA

Select Varieties of Upright Flowering Shrubs

Before and after Planting Showing What Three Months Growth Will Do Toward Making the Grounds Attractive

BEFORE PLANTING. NATURE WAS KIND IN HER ALLOTMENT OF TREES; OTHERWISE PLACE IS BARE. NOTICE TRANSFORMATION IN NEXT PICTURE

THREE MONTHS LATER. PARTIAL PLANTING HYDRANGEA SHRUBS NEXT TO HOUSE. JAPAN BARBERRY THUNBERGH HEDGE ALONG CEMENT WALK

Residence of Mr. F. A. Owen, Dansville, N. Y., planting done by Pomona United Nurseries, to which will be added other varieties of shrubs and evergreens this Spring.

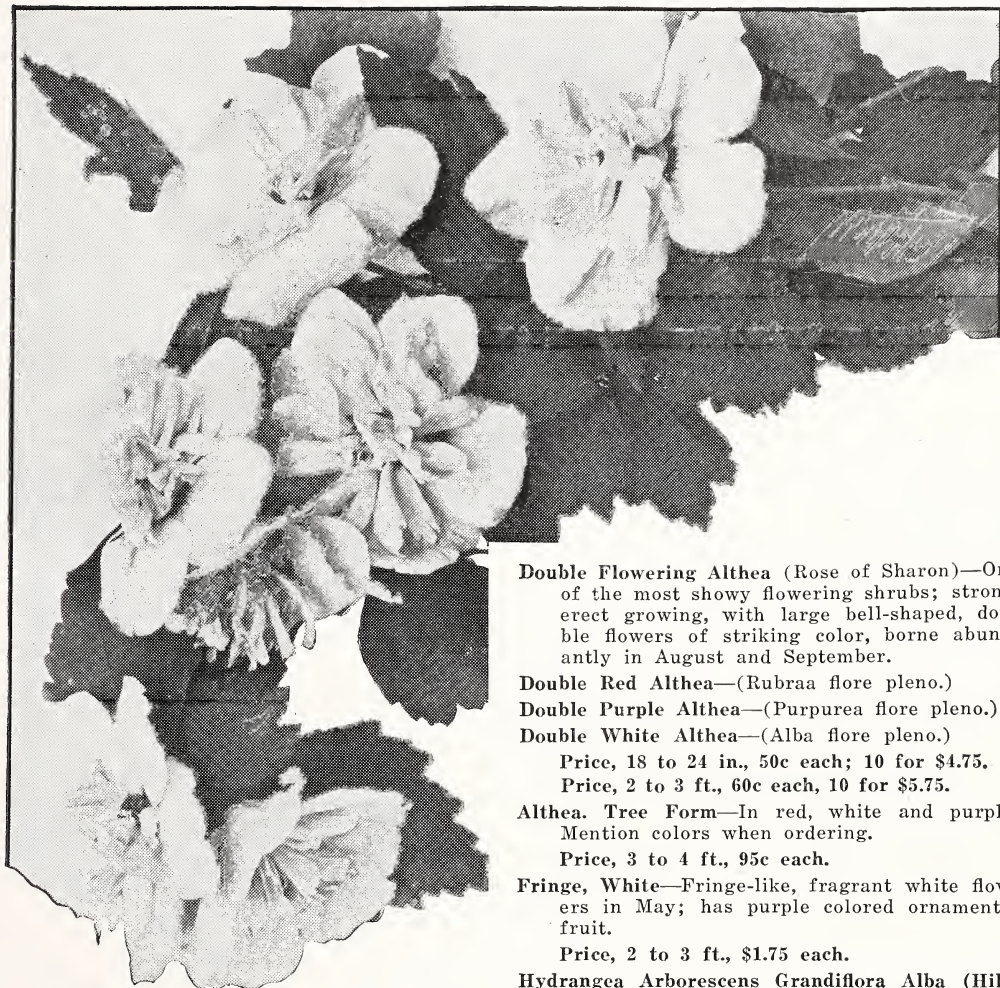

HARDY BUSH HYDRANGEA, PANICULATA GRANDIFLORA

Hardy Bush Hydrangea (*Paniculata Grandiflora*)—We urge our friends to plant the Hydrangea. Plant it for the following reasons: It is hardy, enduring the severest winters outdoors without protection. It is easily transplanted, not one in a thousand dying. It never fails to blossom the first year planted; no matter how small the plant, it immediately buds out in great profusion of flowers. When the specimens first open they are greenish white, later they turn to a pure white, and still later to a delicate pink.

Price strong 2 year Bushes, 18 to 24 inches, 50c each, 10 for \$4.50. 2 to 3 ft., 60c each, 10 for \$5.50.

If Shrubs are sent by mail add 3c each to cover postage.

Propagated Where the Best Trees Grow

DOUBLE FLOWERING ALTHEA

Syringa, Golden-Leaved (P. Foliis Aureis)—A beautiful new variety with bright yellow foliage, which affords pretty contrasts with other shrubs, especially with the purple-leaved variety.

Price, 18 to 24 in., 75c each; 10 for \$7.00.

Price, 2 to 3 ft., \$1.00 each; 10 for \$9.00.

Quince, Japan Scarlet (Cydonia)—Has bright scarlet crimson flowers in great profusion, early spring; one of the best hardy shrubs; makes a beautiful, ornamental hedge.

Price, 18 to 24 in., 60c each; 10 for \$5.75.

Price, 2 to 3 ft., 85c each; 10 for \$8.00.

Calycanthus (Sweet Scented Shrubs)—Flowers purple, very double and deliciously fragrant; remains in bloom for a long time; very desirable.

Price, 18 to 24 in., 50c each; 10 for \$4.75.

Price, 2 to 3 ft., 60c each; 10 for \$5.75.

Syringa—European Fragrant or "Mock Orange" (Philadelphia Coronarius)—A well-known very hardy shrub, with showy white flowers which are very fragrant.

Price, 18 to 24 in., 50c each; 10 for \$4.75.

Price, 2 to 3 ft., 60c each; 10 for \$5.75.

Double Flowering Althea (Rose of Sharon)—One of the most showy flowering shrubs; strong, erect growing, with large bell-shaped, double flowers of striking color, borne abundantly in August and September.

Double Red Althea—(Rubra flore pleno.)

Double Purple Althea—(Purpurea flore pleno.)

Double White Althea—(Alba flore pleno.)

Price, 18 to 24 in., 50c each; 10 for \$4.75.

Price, 2 to 3 ft., 60c each, 10 for \$5.75.

Althea. Tree Form—In red, white and purple. Mention colors when ordering.

Price, 3 to 4 ft., 95c each.

Fringe, White—Fringe-like, fragrant white flowers in May; has purple colored ornamental fruit.

Price, 2 to 3 ft., \$1.75 each.

Hydrangea Arborescens Grandiflora Alba (Hills of Snow)—This hardy American shrub is the very finest addition to this class of plants found in many a year. The blooms are of the very largest size, of pure snow-white color, and the foliage is finely finished.

Price, 2 yr. Bushes, 18 to 24 in., 60c each; 10 for \$5.50. 2 to 3 ft., 75c each; 10 for \$7.00.

HEDGE OF HYDRANGEA ARBORESCENS GRANDIFLORA, (HILLS OF SNOW)

SPIRAEA VAN HOUTTEI—THE MOST POPULAR HARDY SHRUB

SPIRAEA VAN HOUTTEI—Better known and more largely planted than any other shrub. An extremely graceful shrub with long, drooping branches completely covered with flat clusters of white flowers in May and June. When in blossom a hedge of Spiraea Van Houttei is a sight long to be remembered. Cannot be too highly recommended. We consider it the best general purpose shrub.

Price, 18 to 24 in., 45c each; 10 for \$4.00.

Price, 2 to 3 ft., 50c each; 10 for \$4.50.

Weigela (Candida)—Profusion of pure white flowers blooming in June. Very bushy in its growth.

Price, 18 to 24 in., 50c each; 10 for \$4.50.

Price, 2 to 3 ft., 60c each, 10 for \$5.00.

Weigela, Variegated-Leaved (Fol. Variegated)—Leaves bordered with yellowish white, finely marked, flowers bright pink.

Price, 18 to 24 in., 50c each; 10 for \$4.50.

Price, 2 to 3 ft., 60c each, 10 for \$5.00.

Weigela Florabunda (Crimson Weigela)—The flowers are dark crimson, with white stamens projecting from them, reminding one somewhat of Fuschia flowers. It blooms in the spring with other Weigelas, but if plants are topped off after young growth has been made, they bloom profusely in the fall. One of the best.

Price, 18 to 24 in., 50c each; 10 for \$4.50.

Price, 2 to 3 ft., 60c each, 10 for \$5.00.

Weigela Eva Rathke—Flowers brilliant crimson; a beautiful, distinct, clear shade.

Price, 18 to 24 in., 50c each; 10 for \$4.50.

Price, 2 to 3 ft., 60c each, 10 for \$5.00.

Weigela Rosea (Rose-colored Weigela)—An elegant shrub, with fine rose-colored flowers; of erect, compact growth; blossoms in June.

Price, 18 to 24 in., 50c each; 10 for \$4.50.

Price, 2 to 3 ft., 60c each, 10 for \$5.00.

WEIGELA ROSEA

SPIRAEA ANTHONY WATERER

SPIRAEAS—A class of low, compact, easily grown flowering shrubs, vigorous and hardy as a class, with blossom periods extending over a wide range of seasons. We offer the following varieties:

Spiraea Anthony Waterer—This beautiful variety has the same habits as its parent, the Blumalda. It blooms about the close of June, continuing throughout the entire season. It is useful for edging, planting in masses, or as a single specimen where a low, bushy shrub is required.

Price 12 to 18 in., 50c each, 10 for \$4.75.

Price, 18 to 24 in., 60c each, 10 for \$5.75.

Spiraea Billardi (Billiard's Spiraea)—Rose colored, blooms nearly all summer.

Price, 18 to 24 in., 50c each, 10 for \$4.75.

Price, 2 to 3 ft., 60c each, 10 for \$5.75.

Spiraea Prunifolia (Bridal Wreath)—Very double, showy, pure white flowers.

Price, 18 to 24 in., 50c each, 10 for \$4.75.

Spiraea Blumalda—New, and considered one of the finest of this class. Flowers brilliant pink, with variegated foliage.

Price, 18 to 24 in., 50c each, 10 for \$4.75.

Price, 2 to 3 ft., 60c each, 10 for \$5.75.

Spiraea Callosa Alba—A white flowering variety of dwarf habit; very fine, remains in flower all summer.

Price, 18 to 24 in., 50c each, 10 for \$4.75.

Price, 2 to 3 ft., 60c each, 10 for \$5.75.

SPIRAEA THUNBERGII

Spiraea Bloomii—A charming bush that has large panicles of deep, rose-colored flowers. June and July.

Price, 18 to 24 in., 50c each, 10 for \$4.75.

Price, 2 to 3 ft., 60c each, 10 for \$5.75.

Spiraea Thunbergii—(Thunberg's Spiraea D.)—Of dwarf habit and rounded, graceful form; branches slender and somewhat drooping; foliage narrow.

Price, 18 to 24 in., 50c each, 10 for \$4.75.

Price, 2 to 3 ft., 60c each, 10 for \$5.75.

SYRINGA, MOCK ORANGE

SNOWBALL—A WELL-KNOWN FAVORITE SHRUB

Snowball, Common—Flowers white, in clusters, very attractive when in bloom, May to June.
 Price, 18 to 24 in., 60c each. 2 to 3 ft., 75c each. 3 to 4 ft., 85c each.

Snowball, Common Tree Form.
 Price, 3 to 4 ft., \$1.25 each.

Snowball, Japan—White flowers in June. A fine shrub with very beautiful foliage.
 Price, 2 to 3 ft., \$1.00 each. 3 to 4 ft., \$1.25 each.

Snow Berry—An old time shrub. Produces clusters of pure white berries which remain nearly all winter.
 Price, 18 to 24 in., 40c each. 2 to 3 ft., 50c each.

Almonds—Beautiful, showy, double rose colored flowers in May.
 Price, 2 to 3 ft., \$1.25 each. Price, 3 to 4 ft., \$1.50 each.

Golden Elder—Bright yellow foliage, which affords pretty contrast with other shrubs.
 Price, 2 to 3 ft., 50c each; 10 for \$4.50.

Dogwood—White flowering. White flowers in May. A very beautiful tree with scarlet berries.
 Price, 2 to 3 ft., \$1.85 each.

Dogwood—Red flowering. A red variety similar to white flowering dogwood, but with handsome red flowers.
 Price, 2 to 3 ft., \$2.00 each.

Butterfly Bush—Very ornamental. Lilac-like flowers in July to Sept.
 Price, 2 to 3 ft., 45c each; 10 for \$4.00.

BUTTERFLY BUSH GROWING IN NURSERY ROWS

Propagated Where the Best Trees Grow

DEUTZIA, PRIDE OF ROCHESTER

DEUTZIA—This valuable species of plants comes to us from Japan. Their hardiness, luxuriant foliage and profusion of attractive flowers, render them deservedly among the most popular of flowering shrubs. The flowers are produced in June in racemes four to six inches long.

Deutzia, Double Flowering (Crenata)—Flowers double white, tinged with rose. One of the most desirable flowering shrubs in cultivation.

Price, 18 to 24 in., 50c each; 10 for \$4.50

Price, 2 to 3 ft., 60c each; 10 for \$5.00.

Deutzia Pride of Rochester—A new variety raised from Deutzia Crenata, and exceeding all others in size of flowers, length of panicles, profuseness of bloom and vigorous habit; a charming acquisition to the list of Deutzias.

Price, 18 to 24 in., 50c each; 10 for \$4.50

Price, 2 to 3 ft., 60c each; 10 for \$5.00.

Deutzia Lemoinei—Flowers pure white, borne on stout branches of upright growth. Dwarf and free flowering, much prized for cemetery planting and in front of taller shrubbery.

Price, 18 to 24 in., 50c each; 10 for \$4.50

Price, 2 to 3 ft., 60c each; 10 for \$5.00.

Deutzia, Slender Branched (Gracilis)—A charming variety introduced by Dr. Siebold. Flowers pure white and so delicate that they are very desirable for decorative purposes.

Price, 18 to 24 in., 50c each; 10 for \$4.50

Price, 2 to 3 ft., 60c each; 10 for \$5.00.

LILACS—Best beloved of all the old time garden shrubs; whose flowers never fail to charm with

their delicate beauty or refresh the soul with their fragrance.

Lilac, Purple—The well-known variety, one of the best. A good grower; flowers and young wood fragrant; purple.

Price, 18 to 24 in., 50c each; 10 for \$4.50

Price, 2 to 3 ft., 60c each; 10 for \$5.00.

Lilac, White—A very desirable contrast to the purple; those who have one should have the other.

Price, 18 to 24 in., 50c each; 10 for \$4.50

Price, 2 to 3 ft., 60c each; 10 for \$5.00.

PURPLE LILAC

Select Varieties of Hedge Plants

CALIFORNIA PRIVET HEDGE

An almost evergreen shrub of dense, shapely habit, with shining dark green foliage

California Privet—A vigorous-growing variety, of fine habit, thick, glossy, nearly evergreen leaves. Of all ornamental hedge plants this is the most highly prized. If cut to the ground one or two years after planting, it makes a very thick hedge right

from the bottom, sending up many strong shoots. The Privet in all its varieties deserves attention as an ornamental plant. It is almost an evergreen, and grows freely in all soils; compact and regular in its form, and bears shearing to any extent. The leaves are a rich green, and will remain on the plants up to Christmas, and if they are a little sheltered they will keep almost all winter.

POMONA LOW PRICE FOR CALIFORNIA PRIVET, 2 YEAR, WELL BRANCHED

12 to 18 in.	15¢ each	10 for \$1.25	100 for \$ 6.50	1000 for \$45.00
18 to 24 in.	20¢ each	10 for \$1.50	100 for \$ 8.00	1000 for \$65.00
2 to 3 ft.	25¢ each	10 for \$1.75	100 for \$ 9.50	1000 for \$75.00

DWARF BARBERRY HEDGE

Barberry Thunbergii (dwarf)—From Japan. A beautiful shrub of dwarf habit, not growing more than three feet high; covered with yellow flowers, followed by scarlet fruits on long stems that last nearly all winter. The foliage is dense, green, changing to a coppery red in autumn. It makes a very beautiful and showy hedge.

PRICE FOR BARBERRY THUNBERGII

Strong 2 Year Bushes Well Branched

12 to 18 inches,	30c each;	10 for \$2.75;	100 for \$20.00.
18 to 24 inches,	35c each;	10 for \$3.25;	100 for \$25.00.

"LODENSE" NEW DWARF PRIVET

A PLANTING OF NEW LODENSE PRIVET BORDERING ON THE WALKS AT THE NEWARK COUNTRY CLUB

The Lodense Privet stands shearing very well and makes a very good decorative plant for tubs, pots, and boxes.

Lodense Dwarf Privet is going to be one of the most rapidly moving items of stock we have ever handled. We know our customers will want it when they see it and learn about its distinctive habits of growth.

This is a new, dwarf and distinct form of Privet of extremely compact and low growing habit. It has been under observation for the last four years and its habits of growth are unquestionably fixed. The foliage is rich, dark green and of extreme hardiness. It is particularly useful for low hedges and borders, as it stands shearing very well and can be kept low and compact.

We recommend it very highly and because the supply will be limited we urge you to get your order in now—when delivery can be guaranteed. Strong, healthy stock exclusively.

PRICE FOR LODENSE PRIVET

Strong 2 year Bushes, 12 to 15 in., 35c each;
10 for \$3.00; 100 for \$25.00.

Strong 2 year Bushes, 6 to 12 in., 30c each;
10 for \$2.50; 100 for \$20.00

Willseyville, N. Y., Nov. 2, 1925.
Pomona United Nurseries,

The stock arrived O. K. and is certainly fine. So nice and clean. Also such nice roots. Will want more next Spring.

Very truly yours,
Geo. H. Cummings.

NO MATTER HOW SMALL the order, it is always a pleasure to render the best at our command in the way of service.

WE MAKE A SPECIAL EFFORT to give customers prompt service, together with high class stock and quote prices which we feel satisfied are as low as anyone can offer on the same grade.

Select Varieties of 2 Year Rose Bushes

PAUL NEYRON ROSE

La France—Rich satiny peach, changing to deep rose; large and full. A constant bloomer. The sweetest of all.

Magna Charta—Pink and carmine; very large and full; a profuse bloomer. Fragrant. Free grower.

Frau Karl Druschki (Snow Queen)—A new rose of great merit. There is nothing in white roses quite as fine as this. Pure white, large and of elegant form.

Coquette des Alps—White, slightly shaded with carmine; strong grower and a great favorite.

Marshall P. Wilder—Bright cherry carmine; very fragrant and one of the freest bloomers.

Baron de Bonstetten—Flowers large and very double; color rich, dark red, passing to deep velvety maroon. Very fragrant.

Clio—New. The perfection in Hybrid Perpetuals. Of delicate satin blush with a little deeper center. Large, well shaped and very double. Strong, robust, hardy and prolific. A jewel.

Blanche Robert—Pure white, large and full, buds very beautiful. A strong grower and a desirable variety.

Alfred Colomb—Very large and full. Brilliant carmine crimson; extremely fragrant. A free grower.

American Beauty—Very large and double. Of globular shape. Deep pink, shaded with carmine. Fragrance exquisite.

Anne de Diesbach—Very large, brilliant crimson; fragrant, vigorous.

Paul Neyron—The largest of all. Deep rose color. A free bloomer and vigorous grower.

Mrs. J. Laing—Very free flowering; commences early and continues to bloom profusely until fall. Of delicate pink color.

If sent by mail add 3 cents each to cover postage.

MAGNA CHARTA

Pomona price for all varieties of hardy Roses, strong 2 yr. bushes, 65¢ each, 10 for \$6.00

Propagated Where the Best Trees Grow

Select Varieties of 2 Year Rose Bushes

Margaret Dickson—New, perfectly hardy and very vigorous. A free summer and autumn bloomer. Flowers white with pale flesh center, of a waxy texture and delightful fragrance.

Prince Camile de Rohan—Very dark velvety crimson, changing to intense maroon.

Persian Yellow—Deep, bright yellow; small but handsome; double; a very early bloomer, and much the finest hardy yellow rose.

John Hopper—Bright rose with carmine center; large and full. A profuse bloomer and standard sort.

John Keynes—Of brilliant red, shaded with velvety crimson; magnificent buds.

General Jacqueminot—Brilliant crimson; large and fine. Beautiful in bud and a universal favorite.

Mad. Plantier—Pure white, large and very double. A free bloomer and grower.

FRAU KARL DRUSCHKI

Sunburst—Rich yellow, shaded coppery orange.
Killarney—White.

Harrison's Yellow, Free—Double; bright yellow; very showy and fine.

Salet Moss—A vigorous grower and perpetual bloomer, color light rose, the best of its class.

If sent by mail add 3 cents each to cover postage.

PINK KILLARNEY

Hybrid Teas and Everblooming Roses

A select list of the very best varieties

General MacArthur—Scarlet, red.

Gruss an Teplitz—Scarlet.

J. L. Mock—Deep Pink.

Kaiserin Auguste Victoria—White.

Killarney—Pink.

Lady Hillingdon—Apricot yellow.

Lieutenant Chaure—Crimson red.

Mme. Edouard Herriott—Coral red, shades yellow and scarlet.

Premier—Rich deep rose color.

Radiance—Carmine pink, yellow at base of petals.

WHITE KILLARNEY

Pomona price for all varieties of hardy Roses, strong 2 yr. bushes, 65¢ each, 10 for \$6.00

Select Varieties of 2 Year Rose Bushes

CRIMSON RAMBLER FOR COVERING TRELLISES AND WALL

Crimson Rambler—A climbing rose of unusual attractions. Very hardy, having withstood 10 degrees below zero without covering. Vigorous in growth, having grown 8 to 10 feet in a season. Produces a profusion of blossoms, having been known to produce 300 blossoms on one shoot. The Crimson Rambler is especially adapted for covering trellises.

Philadelphia Rambler—This variety is a cross between Crimson Rambler and Hybrid Perpetual Victor Hugo and is identical in all respects to the Crimson Rambler except in color, which is deeper, brighter and more intense crimson, which never fades out.

Dorothy Perkins—Perfectly hardy; flowers of large size for this class of rose, usually about one and one-half inches across; are borne in clusters from ten to thirty and are very double; the petals are very prettily rolled back and crinkled. Color beautiful, clear shell pink and holds a long time without fading.

White Rambler—Also perfectly hardy and a strong, vigorous grower; flowers white.

Baltimore Belle—Pale blush, nearly white. Blooms in clusters.

Yellow Rambler—A strong grower, with large trusses of nearly double pale yellow flowers; fragrant.

Red Baby Rambler—A dwarf (bush) form of Crimson Rambler, and furthermore, ever-blooming. Will bloom continuously throughout the summer if planted out-of-doors.

RED BABY RAMBLER

Pomona price for all varieties of hardy Roses, strong 2 yr. bushes, 65 each, 10 for \$6.00

If Rose Bushes are sent by mail add 3c each to cover postage.

Perennials and Bulbs

AN ATTRACTIVE HEDGE OF PEONIES

Peonies

- Mme. Lebon.** Bright cherry-pink.
Mme. Rose Rendatler. Delicate rose.
Mons. Barral. Soft, clear lilac-rose; large and full; long stems.
Mons. Dupont. Ivory-white.
Prolifera Tricolor. Soft flesh, with center of golden yellow.
Queen Victoria (Whitley). White. Standard for market or storage.
Grandiflora Rosea. Light rose; outer petals very large, inner smaller and bunched; vigorous grower.
Humei. Cherry-pink, with silver tips.

Price strong roots 3 to 5 eyes
 50¢ each, 10 for \$4.50

Iris

- Blue King.** Clear, bright blue.
Celeste. Falls bright blue, uppers delicate grayish blue; all having a lavender effect.
Isolene. Standard pale lavender; falls light purple overlaid brown; beard yellow.
Helge. Lemon yellow with pearl shadings.
Mrs. Neubronner. One of the finest of the newer yellow varieties; deep, golden yellow.
Victorine. A very pretty and distinct sort; white, with the falls attractively mottled violet.

Price 30¢ each, 10 for \$2.50

A CLUMP OF IRIS

Phlox

- Baron von Dedem.** Brilliant cochineal-red, with salmon shadings.
Albion. White, with faint red eye.
Athis. Salmon-pink.
Lothair. Bright crimson.
Louise Abbema. White; dwarf.
Lumineaux. Pinkish.

Price 25¢ each, 10 for \$2.25

A CLUMP OF CANNAS

Cannas

- Alphonse Bouveer.** Flowers light crimson changing as the season progresses to deep crimson.
David Harum. Bright, deep vermillion, flowers on bronze foliage.
King Humbert. One of the finest of the Cannas; large, heart-shaped leaves, bronze tinted with purple. Covered with immense, orchid-like flowers; individual petals are of immense size, orange-scarlet and carmine in color.
Queen Charlotte. Wide band of yellow bordering a center of crimson-carmine.
Queen Helen. This is a new sort from the King Humbert, resembling it to a great extent, except the foliage is rich green instead of bronze; the same type of immense flower of brilliant yellow and stem of red.

Price 40¢ each, 10 for \$3.50

EVERGREENS

Boxwood—This old-fashioned variety is a native of England where it has been grown for centuries. Its neat, dense, waxy foliage has secured many admirers. It is well adapted to small places and can be used with splendid effect as shrubs for the lawn. For decorative purposes both summer and winter. Price, 18 to 24 inches, \$4.00 each.

Austrian Pine—A rapid growing species from the mountains of the Austrian Empire. It has very stout branches, with long, rigid bluish green foliage, and presents a massive appearance in contrast with other conifers. It is very hardy, not especially particular in regard to soils, and valuable for windbreaks, etc. Price, 2 to 3 ft., \$4.00 each, 18 to 24 in., \$3.50 each.

Scotch Pine—A rapid-growing, very hardy evergreen, especially adapted for windbreaks and grouping. It is a native of central and northern Europe, forming large trees with pleasing glaucous green foliage. Although quite ornamental when young, this species is more picturesque than beautiful with age. Price, 2 to 3 ft., \$4.00 each, 18 to 24 in., \$3.00 each.

Irish Juniper—Junipers are handsome evergreens. Always neat and clean. This variety grows exceptionally slim and column-like. The branches grow almost straight up, and a 7 or 8 foot tree will not be more than a foot and a half thick. Price, 2 to 3 ft., \$4.00 each; 18 to 24 in., \$2.75 each.

American Arbor Vitae—Much used for hedges, screens, singly on lawns, and in tubs for porches, etc. It is a handsome little tree, and if allowed to grow naturally will be quite tall and pyramid-shaped. Can be trimmed and kept in any form and height. In the summer the foliage is bright green above, yellowish beneath, and when winter comes this changes to the richest tones of brown and bronze. Price, 12 to 18 in., \$1.50 each, 10 for \$13.50; 18 to 24 in., \$2.00 each, 10 for \$18.50.

AMERICAN ARBOR VITAE

NORWAY SPRUCE

Norway Spruce—A lofty, elegant tree of perfect pyramidal habit, remarkably elegant and rich. As it gets age, has fine, graceful pendulous branches. It is exceedingly picturesque and beautiful. Very popular and should be largely planted. One of the best evergreens for hedges. Price, 18 to 24 in., \$1.85 each, 10 for \$17.50; 2 to 3 ft., \$2.00 each, 10 for \$18.50.

Pyramidal Arbor Vitae—One of the most beautiful varieties, very erect and regular in form, resembling the Irish Juniper; foliage a deep green color, well retained in winter; perfectly hardy. Unlike the Juniper it is easily transplanted and sure to give satisfaction. Price, 18 to 24 in., \$3.00 each; 2 to 3 ft., \$6.00 each.

Mugho—Dwarf Mountain Pine. Low, dense and spreading in growth, usually broader than its height. One of the most attractive and valuable of our dwarf Evergreens. Price, 12 to 18 inches, \$5.00 each. 18 to 24 inches. \$6.00 each.

Colorado Blue Spruce—This Blue Spruce is hardy, healthy and very beautiful. Its foliage is a steel blue. Price, 12 to 18 in., \$6.00 each.
